/a For state-administered programs, estimates by district are net of state administrative costs and other state-level activities. As a result, the sum of all districts will not equal state totals reported elsewhere. This applies to at-large districts as well. The difference will be the amount retained by the state for its own purposes, as authorized.

/b Includes funding under regular FY 2009 appropriations.

/c Includes the funding increase under regular FY 2009 appropriations, and reflects allocations to date only.

/d Estimates include formula subgrants only and exclude competitive awards to high-need local educational agencies. Formula distributed subgrants represent half of all funds available under the program.
