2. make arrangements or preparations for (an event or activity); coordinate.

communication
kəˌmyōōnəˈkāSH(ə)n/
noun
1. the imparting or exchanging of information or news.

2. means of connection between people or places, in particular.
Key tenants of NEA interpretation of these definitions:

**Center for Organizing:**
The C4O considers organizing an intentional and strategic approach to the work of the Association, one that relies on data analytics to inform a theory of what it takes to grow strong Affiliates and realize our mission of great public schools for all students.

**Center for Communications:**
The art of communications sends a message that educates, persuades, engages, incites action and moves people to achieve defined goals.

**Organizing Communications** is the marriage of these two philosophies to strategically use the tactics of communication – message, websites, social media, press outreach, tool kits, talking points, videos and memes, organizing tools like Action Network, Editorials/Letters to the Editor, email, advertising and publications – to meet membership growth and issue campaign goals as well as to engage members and the public to advance opportunities for students and ensure our members have what they need to ensure student success.
