Arkansas
Impact of Declining Revenues on Higher Education
From 1991-2016

State Appropriations and Tuition

Compared to the rest of the nation, Arkansas’s higher education expenditures (both for students and the government) have remained relatively flat since 1991. The overall cost for education has only risen 20% since 1991. However, since the Great Recession, tuition costs for students have risen dramatically (see figure below). Since 2011, tuition costs have risen 44%. Also, enrollment in higher education institutions peaked in 2011 and have been on a decline since.
