

When corporations
avoid paying taxes...

public education gets shortchanged

The amount of federal revenue
lost through corporate tax
avoidance (2008-10):

\$222.7
billion

The amount of federal revenue
lost through corporate tax
avoidance that would have
gone to public schools
and colleges (2008-10):

\$9.8
billion

What \$9.8 billion would have provided (2008-10):

\$1,092

average amount in extra academic support to help
9 million students in poverty catch up to their peers

\$1,474

average savings for school districts for each disabled
student as a result of greater federal cost sharing

\$1,276

average amount in additional financial aid to ensure 7.7 million
students in need continue or complete their postsecondary studies

446,655

additional children in poverty enrolled in preschool

126,568

education jobs

Source: NEA calculations based on data from the U.S. Department of Education, U.S. Department of Health and Human Services, U.S. Census, and Office of Management and Budget; and the study, Corporate Taxpayers and Corporate Tax Dodgers, 2008-2010, from Citizens for Tax Justice and the Institute on Taxation and Economic Policy. NEA's estimates assume that the additional federal revenue that would have been generated in the absence of the corporate tax avoidance would have been apportioned in the same manner as actually occurred from 2008-10 (excluding stimulus funds). For more information, contact Tom Zembar at 202.822.7109 or TZembar@nea.org. November 7, 2011.
