Foreword

The data presented in this report provide facts about the extent to which local, state, and national governments commit resources to public education. As one might expect in a nation as diverse as the United States – with respect to economics, geography, and politics – the level of commitment to education varies on a state-by-state basis. Thus, NEA Research offers this report to its state and local affiliates as well as to researchers, policymakers, and the public as a tool to examine public education programs and services.

Part I of this report – Rankings 2023 – provides state-level data on an array of topics relevant to the complex enterprise of public education. Since the 1960s, Rankings has presented facts and figures useful in determining how states differ from one another – and from national averages – on important school statistics such as student attendance, teacher employment and average salary, and school revenues and expenditures. Of course, no set of tables tells the entire story of a state's education offerings. Consideration of factors such as a state's tax system, provisions for other public services, and population characteristics also are needed. Therefore, it is unwise to draw conclusions based solely on individual statistics in this report.

Part II of this report – Estimates 2024 – is in its 80th year of production. Estimates provides data tables projecting public school enrollment, employment and compensation of personnel, and finances, as reported by individual state departments of education. The influx of federal funding through COVID relief measures added a new layer of complexity to the development of financial projections. The capacity to report and estimate recent years' financial data varies considerably state by state. COVID relief funding was included in revenue and expenditure data by states if such data was available at the time of survey data collection. For states that did not provide data, the effect of COVID relief funds on revenues and expenditures was estimated based on data from the United States Department of Education.

Part III of this report – National Trends 2015-24 – presents summary data of national trends in student enrollment and attendance, staff salaries, sources of school funding, and levels of educational expenditures in the previous 10 years. Such trends at the national level have been based on data reported state by state.

Public education in the United States is a joint enterprise between local, state, and federal governments. Yet, progress in improving public education stems primarily from the efforts of state education agencies, local districts, and individual schools. These public organizations deserve credit for recognizing that spending for education needs to be acknowledged as an investment in our nation's most valuable resource – students. Similarly, this publication represents a collective effort that goes well beyond the staff of the National Education Association. Individual state departments of education and the NEA's state affiliates participate in collecting and assembling the data presented in this report. As a result, the NEA appreciates and acknowledges the cooperation it receives from all those whose efforts make this publication possible.

NEA Research April 2024

Executive Summary

NEA Research collects, maintains, and analyzes data on issues and trends affecting the nation's public education systems, their employees, and students. This report, Rankings of the States 2023 and Estimates of School Statistics 2024, contains data primarily based on information from state departments of education. Significant highlights of the report are below.

Part I. Rankings 2023 Highlights

Enrollment and Attendance

In fall 2022, U.S. public schools enrolled 49,033,092 students, an increase of 0.3 percent from fall 2021.

The largest increases occurred in Arizona (3.5%), the District of Columbia (2.4%), and Texas (1.7%). The greatest declines were in Hawaii (-1.7%), Illinois (-0.8%), and Rhode Island (-0.8%).

The number of students in average daily attendance (ADA) increased by less than 0.1 percent nationwide, from 45, 603, 712 in 2021-22 to 45, 634, 724 in 2022-23.

Classroom Teachers

U.S. public schools employed 3,222,170 teachers in 2022-23. Texas (371,802), California (292,378), and New York (215,761) employed the most teachers, while Alaska (7,030), Wyoming (7,277), and the District of Columbia (8,052) employed the fewest.

The average number of students enrolled per teacher decreased 0.8 percent from 15.3 in 2021-22 to 15.2 in 2022-23. States with the highest number of students enrolled per teacher in fall 2022 were Nevada (25.4), Arizona (22.9), and Utah (22.2).

States with the lowest student-teacher ratios in fall 2022 were Vermont (10.6), New Hampshire (10.7), and New York (11.1).

Teacher Salary

The national average public school teacher salary for 2022-23 was \$69,544. State average teacher salaries ranged from those in California (\$95,160), New York (\$92,696), and Massachusetts (\$92,307) at the high end to West Virginia (\$52,870), Florida (\$53,098), South Dakota (\$53,153) at the low end.

The national average one-year change in public school teacher salaries from 2021-22 to 2022-23 was 4.1 percent. The largest one-year increases were in New Mexico (17.2%), Mississippi (11.4%), and Alabama (8.2%).

School Revenue

Federal funding continued to comprise a historically high share of school revenues due to the influx of federal COVID relief funds, accounting for 13.2 percent of total revenue receipts in 2022-23. Shares of state and local funding in 2022-23 remained at similar levels as the previous year, at 44.5 percent and 42.3 percent, respectively.

Expenditures per Student

The national average per-student expenditure in 2022-23 based on fall enrollment was \$16,281, a gain of 3.0 percent from \$15,808 in 2021-22. The following states had the highest per-student expenditures: New York (\$30,867), the District of Columbia (\$26,766), and Vermont (\$26,749). Idaho (\$9,599), Utah (\$10,282), and Oklahoma (\$11,089) had the lowest per-student expenditures.

Part II. Estimates 2024 Highlights

Enrollment

Public school enrollment is expected to decrease by an estimated 0.2 percent from 2022-23 (49,033,092) to 2023-24 (48,921,481).

Average Daily Attendance

The number of students in average daily attendance is projected to decrease slightly by 0.4 percent from 45, 634, 724 in 2022-23 to 45, 445, 752 in 2023-24.

Instructional Staff

The total number of instructional staff is expected to increase by 0.3 percent from 3,831,283 in 2022-23 to 3,842,997 in 2023-24.

Classroom Teachers

The number of public school classroom teachers is expected to increase slightly by 0.2 percent from 2022-23 (3, 222, 170) to 2023-24 (3, 228, 578).

Instructional Staff and Classroom Teacher Salaries

The average salary of instructional staff is projected to increase to \$73,841 in 2023-24, a gain of 3.3 percent from 2022-23 (\$71,518).

The average classroom teacher salary for 2023-24 is projected to increase by 3.1 percent over 2022-23, from \$69,544 to \$71,699.

School Revenue

State governments are expected to provide 45.3 percent of public school financial support for 2023-24, up 0.8 percentage points from 2022-23. For 2023-24, the federal government's contribution to public elementary and secondary school revenues is estimated to be 12.4 percent, versus 13.2 percent in 2022-23. In 2023-24, the contribution from local government is an estimated 42.4 percent, a slight increase from 42.3 percent the previous year.

Student Expenditures

Expenditures per student in fall enrollment are projected to increase by 2.7 percent to \$16,722 in 2023-24, up from \$16,281 in 2022-23. This rate compares with a 2.5 percent increase in total current expenditures.

Part III. National Trends 2015-24 Highlights

School Districts

The number of school districts decreased slightly from 2014-15 (16, 638) to 2023-24 (16, 423). Of these 16, 423 school districts, 16, 201 (98.6%) are operating school districts.

Fall Enrollment

Public school enrollment declined by an estimated 2.0 percent from fall 2014 (49,922,708) to fall 2023 (48,921,481).

Average Daily Attendance

The total number of students measured by average daily attendance decreased by an estimated 2.9 percent over the past decade, from 46, 778, 931 in 2014-15 to 45, 445, 752 in 2023-24.

Instructional Staff

Public schools employed an estimated 3,842,997 instructional staff in 2023-24, reflecting a 5.2 percent increase compared to 3,654,342 in 2014-15.

Classroom Teachers

The number of K-12 classroom teachers is estimated to be 3, 228, 578 in 2023-24, an increase of 2.5 percent compared to 3, 148, 692 in 2014-15.

Instructional Staff and Classroom Teacher Salaries

The national average instructional staff salary for 2023-24 is estimated at \$73,841, representing a gain of 23.7 percent since 2014-15 (\$59,712).

The average classroom teacher salary is estimated at \$71,699 for the 2023-24 school year, an increase of 24.2 percent over \$57,737 in 2014-15.

Inflation-adjusted Salaries

There are significant differences between the average salaries in current dollars and constant dollars. The growth in current-dollar salaries for both instructional staff and classroom teachers has been substantial since 2014-15. However, when considering the effects of inflation, the average salary of classroom teachers has actually decreased by an estimated 5.3 percent from 2014-15 to 2023-24. Similarly, the average salary for instructional staff has decreased by an estimated 5.7 percent.

Total Receipts

Total national public school revenue and nonrevenue receipts for 2023-24 are estimated at \$1.0 trillion, an increase of 42.2 percent since 2014-15. When adjusted for inflation, total receipts increased an estimated 8.4 percent over the decade.

Revenue Receipts

From 2014-15 to 2023-24, public school revenue receipts rose by an estimated 43.1 percent. Adjusting for inflation, these revenues increased 9.1 percent over the decade.

During this 10-year period, the share of state funding ranged between 44.4 and 47.6 percent of total revenue receipts. State education resources increased by 37.8 percent from school year 2015 to 2024, but increased 5.0 percent when adjusted for inflation. Local governments contributed slightly less to school revenue receipts as the state governments, with shares ranging from 42.3 percent to 45.4 percent.

From 2014-15 to 2023-24, the federal share grew from 8.3 to 12.4 percent. Federal resources increase by 113.9 percent in current dollars and 63.1 percent when adjusted for inflation.

Total Expenditures

The total amount to be spent for current expenditures, capital outlay, and interest payments increased 44.0 percent from 2014-15 to 2023-24. Adjusting for the effects of price inflation, total expenditures increased by 9.8 percent over the decade.

Current Expenditures

Current expenditures for public schools grew from \$572.3 billion in 2014-15 to \$818.1 billion in 2023-24, a 42.9 percent increase. Current expenditures grew by 9.0 percent during the 10 years in inflation-adjusted dollars.

Current Expenditure Per Student in Enrollment

Over the last decade, average per-student expenditure rose by 45.9 percent from \$11,465 to \$16,722. After inflation adjustment, the expenditure per student in enrollment increased by 11.2 percent.

Current Expenditure Per Student in Average Daily Attendance

Average expenditure per student in average daily attendance increased 47.1 percent from \$12,235 in 2014-15, to \$18,001 in 2023-24. The average expenditure increased by 12.2 percent over the decade after being adjusted for inflation.

Technical Notes

The first part of this publication, Rankings 2023, contains ranking statistics of public elementary and secondary schools for the 50 states and the District of Columbia. The education data are the most recent actual or estimated data collected primarily from state departments of education. All tables on schools and students, teachers and instructional staff, school revenues, and education expenditures have been updated from the previous edition.

The second part, Estimates 2024, presents public school data for the 50 states and the District of Columbia based on survey responses from state education agencies. State department of education contacts are asked to provide estimated data for the current year (2023-24) and revisions to six years of historical data, as necessary. Therefore, data for school years 2017-18 through 2022-23 were subject to revision as a result of the 2023 surveys. The estimated data featured in this report are for the current school year (2023-24) and the previous school year (2022-23). These data are provided on a state-by-state basis. All figures represent projections by state education agencies – or NEA Research – as of February 2024.

NEA Research submits current-year estimates of educational statistics to each state's Department of Education for verification or revision each year. The figures are generated primarily using time series analyses, which are standard statistical techniques designed to make predictions for the current year using numerical data from prior years. If an education department does not replace these projections with its own estimated data and NEA Research cannot find an equivalent source of data on the state department of education website, this report uses an estimate generated either from a time-series model that uses past Rankings & Estimates data or from one of two sources: the American Community Survey (ACS) for average salaries, or NCES for non-salary data points. Which estimate source is used depends on NEA's knowledge of an individual state's trends and policy actions over time, the quality of that state's existing Rankings & Estimates data, and the size of the state, as ACS data are most accurate for states with larger populations.

The last part, National Trends 2015-24, highlights summary public school statistics for the United States over the last decade on students, teachers and instructional staff, school revenues, and education expenditures.

NEA Research has calculated salary estimates using American Community Survey data for states that have not reported such data for some years.

Note that throughout this publication school years may be indicated in several equivalent ways. More specifically, the school year from September 2023 through June 2024 may be shown as "2023-24," or it may be indicated by shorthand as "2024," or "24."

Also note that some totals in certain tables may not sum exactly because of rounding. Dollar values are expressed in "current dollars" unless otherwise noted.

The Consumer Price Index for all Urban Consumers is applied for computation of constant dollar salary, revenue, and expenditure data.

Data on COVID relief funds from the United States Department of Education's Education Stabilization Fund Transparency Portal informed revenue and expenditure estimates for the years of 2021-22 through 2023-24.

Glossary

Average Daily Attendance (ADA): The aggregate attendance of a school during a reporting period divided by the number of days school is in session during this period. Only days on which the pupils are under the guidance and direction of teachers should be considered as days in session. The average daily attendance for groups of schools having varying lengths of terms is the sum of the average daily attendances obtained for the individual schools.

Average Salary: The arithmetic mean of the salaries of the group described. This figure is the average gross salary before deductions for Social Security, retirement, health insurance, and so on.

Capital Outlay: An expenditure that results in the acquisition of fixed assets or additions to fixed assets, which are presumed to have benefits for more than one year. It is an expenditure for land or existing buildings, improvements of grounds, construction of buildings, additions to buildings, remodeling of buildings, or initial, additional, and replacement equipment.

Classroom Teacher: A staff member assigned the professional activities of instructing pupils in self-contained classes or courses or in classroom situations. The number of classroom teachers is usually expressed in full-time equivalents.

Current Expenditures: The expenditures for operating local public schools, excluding capital outlay and interest on school debt. These expenditures include such items as salaries for school personnel, fixed charges, student transportation, school books and materials, and energy costs.

Current Expenditures for Other Programs: Current expenses for summer schools, adult education, post-high-school vocational education, personnel retraining, and community services; services to private school pupils, community centers, recreational activities, and public libraries, and so on, when operated by local school districts and not part of regular public elementary and secondary day-school programs.

Debt: The major portion of all state and local government debt constitutes long-term indebtedness. A substantial portion of such long-term debt is nonguaranteed debt (i.e., obligations payable solely from pledged earnings of specific activities or facilities, from special assessments, or from specific nonproperty taxes).

Education: The provision or support of schools and other education facilities and services.

Elementary School: A school classified as elementary by state and local practice and composed of any span of grades not above grade 8. A preschool or kindergarten school is included under this heading only if it is an integral part of an elementary school or a regularly established school system.

Enrollment: A cumulative count of the number of pupils registered during the entire school year. New entrants are added, but those leaving are not subtracted.

Expenditures: All amounts of money paid out by a government—net of recoveries and other correcting transactions—other than for retirement of debt, investment in securities, extension of credit, or as agency transactions. Expenditures include only external transactions of a government and exclude noncash transactions, such as the provision of perquisites or other payments in kind. Aggregates for groups of governments exclude intergovernmental transactions among the governments involved.

Fall Enrollment: The count of the pupils registered in the fall of the school year, usually in October.

Full-Time Equivalent Employment: A computed statistic representing the number of fulltime employees that could have been employed if the reported number of hours worked by part-time employees had been worked by full-time employees. This statistic is calculated separately for each function of a government by dividing the "part-time hours paid" by the standard number of hours for full-time employees in the particular government and then adding the resulting quotient to the number of full-time employees.

High School Graduate: A person who receives formal recognition from school authorities for having completed the prescribed high school course of study; excludes equivalency certificates.

Instructional Staff: Full-time equivalent number of positions, not the number of different individuals occupying the positions during the school year. In local schools, instructional staff includes all public elementary and secondary (junior and senior high) day school positions that are in the nature of teaching or in the improvement of the teaching-learning situation. Includes consultants or supervisors of instruction, principals, teachers, guidance personnel, librarians, and other instructional staff. Excludes administrative staff, attendance personnel, health services personnel, clerical personnel, and junior college staff. In institutions of higher education, includes those engaged in teaching and related academic research in junior colleges, colleges, and universities, including those in hospitals, agricultural experiment stations, and farms.

Interest on Debt: Annual expenditures to pay interest only on long-term debt.

K-12: Kindergarten through 12th grade. Used for convenience of abbreviation in the Rankings tables; comprises "Elementary School" and "Secondary School" as defined in this glossary. Thus, as is the case for "Elementary School," K-12 here may include preschool and/or kindergarten but only if it is an integral part of an elementary school or a regularly established school system.

Noninstructional Staff: In local schools includes administrative and clerical personnel, plant operation and maintenance employees, bus drivers, and lunchroom, health, and recreational personnel engaged by school systems. In institutions of higher education includes cafeteria, clerical, and custodial workers in colleges and universities, hospitals, agricultural experiment stations, and farms.

Nonoperating School District: A school district that does not provide direct instruction for pupils but contracts with or pays tuition to other districts.

Nonrevenue Receipts: The amount received by local education agencies from the sale of bonds and real property and equipment, loans, and proceeds from insurance adjustments.

Operating School District: A school district that directly provides instruction for pupils by hiring its own staff.

Revenue: Revenue receipts for public school purposes derive from three main sources:

Local. Local, intermediate, and other sources include all funds for direct expenditures by local and intermediate districts for school services, for the operation of intermediate departments of education, for employer contributions to retirement systems and/or Social Security on behalf of public school employees, for the purchase of materials for distribution of local school districts, and so on. Includes net receipts from revolving funds or clearing accounts only when such funds are available for general expenditure by the local board of education. Includes gifts and tuition and fees received from patrons.

State. Revenue receipts from state sources include all funds for the operation of the state department of education, for state (employer) contributions to retirement systems and/or Social Security on behalf of school employees, for grants in aid to intermediate and local school districts for school purposes (including funds available from state bond issues for such grants and the costs of textbooks, buses, supplies, etc., purchased by the state for distribution to local school districts), for the payment of interest on state bonds issued to provide grants to local school districts, and all other state revenue for public school purposes. Money collected by the state as an agent of a lesser unit and turned over in like amounts to that unit is not included.

Federal. Revenue receipts from federal sources include money distributed from the federal treasury either directly to local school districts or through the state and county, including grants for vocational education, for aid to federally affected areas, for school lunch and milk programs, for educating Native Americans in local public schools, and money derived from federal forest reserves and federal oil royalties.

School District: An education agency at the local level that exists primarily to operate public schools or to contract for public school services. Synonyms are "local basic administrative unit" and "local education agency."

Secondary School: A school comprising any span of grades beginning with the next grade following an elementary or middle school (usually 7, 8, or 9) and ending with or below grade 12. Both junior high schools and senior high schools are included.

Student-Teacher Ratio: The number of students in the fall enrollment divided by the number of classroom teachers.

Total Expenditures: Includes all current expenditures, capital outlay, and interest on the school debt.

Total Revenue Receipts: Includes all revenue receipts available for expenditure for current expenses, capital outlay, and debt service for public schools, including all appropriations from general funds of federal, state, county, and local governments; receipts from taxes levied for school purposes; income from permanent school funds and endowments; income from leases of school lands; interest on bank deposits; tuition; gifts; and so on. Amounts that increase the school indebtedness or that represent exchange of school property for money are excluded.

State Notes for Rankings and Estimates

The NEA recognizes that each state's department of education (DOE) has its own system of accounting and reporting for state executive and legislative branch purposes. As a result, it is not always possible to obtain completely comparable data for every state. For this reason, NEA Research encourages each state DOE to include any clarifying information that is necessary for a proper interpretation of the data supplied. In response, state education departments have provided clarifying and explanatory information. NEA Research has calculated salary estimates using American Community Survey data for the states that have not reported such data for some years.

ALASKA: Alaska does not compute ADA, only Average Daily Membership (ADM). Hence, reported figures are NEA estimates.

ARIZONA: Teacher data includes both district and charter school teachers. The teacher salary average is based on the School District Employee Report (SDER) and does not include charter school teacher salaries.

CALIFORNIA: Fall enrollment data include Transitional Kindergarten students but do not include students in other federal or state-funded preschool programs such as Head Start or the California State Preschool Program. Average teacher salary data are based on the annual report released by the California Department of Education, "Selected Certificated Salaries and Related Statistics".

CONNECTICUT: Salary estimates have been calculated from American Community Survey data for school years since 2016-17.

DISTRICT OF COLUMBIA: Salary estimates have been calculated from American Community Survey data for school years since 2013-14.

ILLINOIS: Salary estimates have been calculated from American Community Survey data for school years since 2014-15.

MISSOURI: School district count includes charter schools in Kansas City and St. Louis. Instructional staff may include duplicated numbers as a teacher can teach in both elementary and secondary levels. Average teacher salary figures for 2023 and 2024 do not include payments from the Teacher Baseline Salary Grant. The salary averages with Teacher Baseline Salary Grant payments included are 54,256 for 2023 and 55,875 for 2024.

MONTANA: Salary estimates have been calculated from American Community Survey data for school years since 2010-11.

NEVADA: Nevada collects and reports average daily attendance rates, not the numbers. Hence, reported figures are NEA estimates.

NEW JERSEY: Salary estimates have been calculated from American Community Survey data for school years since 2011-12.

NEW YORK: New York City districts are reported as one district. The New York Department of Education does not report ADA; hence, NEA estimates are used.

NORTH CAROLINA: Salary averages are based on data published in the annual Highlights of the North Carolina Public School Budget report released by the North Carolina Department of Public Instruction. Salary averages include local supplementary pay in addition to the base salary, but exclude bonuses and extra pay.

RHODE ISLAND: Salary estimates have been calculated from American Community Survey data for school years since 2010-11.

SOUTH DAKOTA: The contracted staff at Abbot House, Ombudsman, and Mitchell High School technical education classes were included in these figures.

TEXAS: Expenditure figures were estimated by the Texas Education Agency and may include federal COVID relief revenues that have been allocated but not yet spent.
