Choose the NEA Retiree Health Program

To Help Protect Yourself and Your Savings

The NEA Retiree Health Program is designed to supplement Medicare and costs less, on average, than plans from the best-known providers.

Open Enrollment is taking place now through November 30, 2025. That means Medicare eligible NEA members in good standing, their spouses, domestic partners, and surviving spouses are guaranteed acceptance with no waiting periods, regardless of preexisting health conditions. In addition, if you join the NEA Retiree Health Program during this Open Enrollment Period as a first-time enrollee, you will pay just \$1* for the first month of coverage.

- Guaranteed acceptance during Open Enrollment Period
- Freedom to choose your own doctors who accept Medicare
- Nationwide coverage with multiple plan options
- Your spouse, domestic partner, and surviving spouse may also be eligible to participate

**Open Enrollment is
currently underway,
now through
November 30, 2025**

Guaranteed acceptance!

For more information, please call a member service representative at 844-213-1556 Monday – Friday, 8:30am to 5:00pm (Central time), or visit neamb.com/rhp for your enrollment kit.

ATTO SPORT

THE MOST ADVANCED PORTABLE MOBILITY SCOOTER IN THE WORLD

Where engineering excellence meets sleek design - a lightweight, safe, customizable, and stylish scooter for **UNLIMITED FREEDOM**.

Numerous scooters with various features and capabilities are on the market, making it crucial to select the one that best suits your requirements.

How did Anna start to enjoy life to the fullest?

At the age of 56, a back operation left me dependent on a cane, significantly impacting my daily life. Simple tasks like going to the store or meeting friends became challenging, and I even had to cancel a long-awaited anniversary trip to Italy.

My husband purchased a scooter for me, but it was cumbersome and uncomfortable for everyday use, leaving me feeling more constrained than liberated. However, everything changed when I came across the ATTO SPORT. This remarkable scooter proved to be a game changer. Not only is it robust and reliable, but it also conveniently splits into two pieces, allowing me to effortlessly lift it into my car trunk on my own. I was even able to stow it in the overhead compartment on the plane, enabling us to finally take that trip to Italy! I am now independent once more, able to go wherever I please and do so with a striking sense of style. In fact, I now find that my husband struggles to keep up with me!

CRUISES

ROAD TRIPS

FLIGHTS

What makes ATTO so unique?

- **Independence and convenience:** Easy to use and conveniently folds into a compact suitcase size for simple storage. It easily separates into two parts in seconds, with the heaviest piece weighing just 37 pounds, making it easier to lift into your car trunk.
- **Go anywhere:** Conquer any terrain with puncture-proof, shock-absorbing tires and a 4-inch ground clearance. Equipped with electronic stability control for added safety on descents and turns, it is also flight-approved, ideal for air travel and cruise ships. With a driving range of up to 12.5 miles (25 miles with the XL battery), a top speed of 6.2 MPH, and a maximum weight capacity of 300 pounds, this durable scooter is designed for longevity.
- **Top-Notch Engineering:** Guaranteeing both comfort and durability, this scooter offers ample legroom and a big comfortable seat. The ATTO is super portable and lightweight, and still rides like a heavy-duty scooter.
- **Unmatched Stylish Design:** You deserve a mobility solution that doesn't just get you from A to B but makes you feel great while doing so. ATTO stands out from the crowd with its stunning design.

Airline approved. Spacious legroom, comfortable seat

Lightweight design makes lifting effortless

Folds in 3 seconds, rolls like a trolley suitcase

BUY AN ATTO SPORT AND GET AN EXTRA XL BATTERY UP TO 25 MILES RANGE, FOR FREE

HOME AND SHOWROOM DEMONSTRATIONS AVAILABLE.

Our nationwide team of mobility experts is committed to helping you find and customize the mobility scooter that perfectly suits your lifestyle.

THE NATIONAL EDUCATION ASSOCIATION
We, the members of the National Education Association of the United States, are the voice of education professionals. Our work is fundamental to the nation, and we accept the profound trust placed in us.

OUR VISION IS A GREAT PUBLIC SCHOOL FOR EVERY STUDENT.

OUR MISSION
To advocate for education professionals and to unite our members and the nation to fulfill the promise of public education to prepare every student to succeed in a diverse and interdependent world.

OUR CORE VALUES
These principles guide our work and define our mission:

EQUAL OPPORTUNITY.
We believe public education is the gateway to opportunity. All students have the human and civil right to a quality public education that develops their potential, independence, and character.

A JUST SOCIETY.
We believe public education is vital to building respect for the worth, dignity, and equality of every individual in our diverse society.

DEMOCRACY.
We believe public education is the cornerstone of our republic. Public education provides individuals with the skills to be involved, informed, and engaged in our representative democracy.

PROFESSIONALISM.
We believe that the expertise and judgment of education professionals are critical to student success. We maintain the highest professional standards, and we expect the status, compensation, and respect due to all professionals.

PARTNERSHIP.
We believe partnerships with parents, families, communities, and other stakeholders are essential to quality public education and student success.

COLLECTIVE ACTION.
We believe individuals are strengthened when they work together for the common good. As education professionals, we improve both our professional status and the quality of public education when we unite and advocate collectively.

The Things I've Learned

As I reflect on where NEA-Retired has come from and look to where we are headed, I think of all the profound lessons I've learned throughout my professional and personal life. Yep, I'm a slow learner. I didn't learn everything I needed to know in kindergarten.

However, I've learned that good health is a blessing that money cannot buy.

I've learned that a pat on the back—though only a few vertebrae removed from a kick in the pants—is much more effective.

I've learned that, since we're going to be thinking anyway, why not think big?

I've learned that even if you're on the right track, you'll get run over if you just sit there.

I've learned that you miss 100 percent of the opportunities you don't seize.

I've learned that as we age, if we don't keep moving, we rust.

I've learned that without hope, the heart would break.

I've learned that I should never underestimate my worth by comparing myself with others. It is because we are different that each of us is special.

I've learned that without forgiveness, life remains trapped in a never-ending cycle of resentment and retaliation.

I've learned that we should work as if we don't need money, love as if we've never been hurt, sing as if no one can hear us, and dance as if no one's watching.

I've learned that we all have two ends, one to sit on and one to think with. Success depends on which one you use. Heads, you win; tails, you lose.

As you start a new association year, what will you learn? Let's make it a good one as we continue to advance the work of NEA-Retired.

Important Update to NEA Life and AD&D Insurance Plans

This is a notice for a change made to the NEA Life and Accidental Death & Dismemberment (AD&D) Insurance Plans.

Maintaining active NEA membership is a requirement at the time of application and to continue coverage under the NEA Life and AD&D Insurance Plans. However, with this new change, if you fail to maintain your NEA membership, you will remain covered under your NEA Life and AD&D Insurance Plan through your premium paid date.

It is important to note that during the time this policy has been in force, a claim would have been adjudicated just like any other NEA MIT Life Insurance policy and a claim paid, if affirmed. Therefore, your insurance policy will not be cancelled, nor a refund provided, back to when your NEA membership terminated.

This adjustment provides a grace period, allowing members who inadvertently let their NEA membership lapse to retain their insurance coverage temporarily. To ensure uninterrupted coverage beyond this period, it's essential to renew your NEA membership promptly. Maintaining active membership is crucial, as all insurance plans offered through NEA MIT require NEA membership for continued coverage.

For more information about the change or to fully review the language contained on your rider, visit neamitplans.com/certificate-rider-notification or click the QR code.

Joy, Justice, and Excellence

Dear NEA members,
I am honored to serve as
your president.

United, we will reclaim public education as a common good and transform it into a racially and socially just system that actually prepares every student—not one, not some, but every single student—to succeed in a diverse and interdependent world. **Onward!**

Becky Pringle

Becky Pringle
NEA President

“

“You are the holders of hope and the keepers of dreams. You provide love and care to our students and to each other. ... Our country is depending on us, on this community, to lead the way ... from dogmatism back to decency and democracy.”

—Becky, addressing nearly 7,000 delegates at NEA’s 2025 Representative Assembly, in Portland, Ore.

Face to Face with NEA members

This summer in Chicago, I joined hundreds of labor and community leaders from across the country to collaborate and build power. Our goal? To raise our collective voice for workers, not billionaires! During my time in the Windy City, I talked with state and local affiliate leaders who strategized with us, and partners, about organizing and mobilizing to fight back and fight forward in the face of unprecedented attacks on public education, workers’ rights, and our democracy. As I spoke with these dedicated members, I was so moved by their commitment to speaking out and taking action to ensure every public school is a place of dignity, opportunity, and respect.

(Top) I was so inspired by the many NEA members, including those from Kansas NEA, who gathered in Chicago to build our union power. (Bottom) It was my honor to address the city’s “Good Trouble Lives On” protest against the Trump administration’s attacks on civil rights.

PHOTOS: NEA

JOIN ME 3 Things To Do For Yourself and Your Union

- 1. Be that trusted adult for a student.** October is National Bullying Prevention Month. Research shows that having at least one trusted adult at school can minimize the mental health toll of bullying. Find out how you can help a bullied student at nea.org/BullyFree.
- 2. Resist!** Attacks on public education are coming fast and furious. We must take action to protect our students and schools. Find out how NEA is aligning with local and state affiliates so our members can build power together for educators, students, and public education at nea.org/Protect.
- 3. Say no to vouchers.** Voucher schemes strip desperately needed funds from public schools and direct it to unaccountable private schools instead. Much of the money goes to families with children who already attend private school, leaving our public schools with even fewer resources. We must continue to fight vouchers at the ballot box and in our communities. Learn more at nea.org/Vouchers.

Find out how NEA is working every day for educators, students, and public schools in “NEA in Action” (Page 10).

In the News: Protecting Students

“Parents, educators, and community leaders won’t be silent as Trump and his allies take a wrecking ball to public schools and the futures of the 50 million students in rural, suburban, and urban communities across America. We will continue to organize, advocate, and mobilize until all students have the opportunity to attend the well-resourced public schools where they can thrive.”

—Becky, *New York Times*, July 15, 2025

What I’m Reading

This year marks the 50th anniversary of the Individuals with Disabilities Education Act (IDEA), on Nov. 29, and the 35th anniversary of the Americans with Disabilities Act, on July 26. To honor these milestones, I’m learning about the disability justice movement by reading *Disability Visibility: First-Person Stories from the Twenty-First Century*, edited by Alice Wong. This inspirational must-read brings together essays from writers with disabilities, advocates, and activists, who share stories and perspectives from the disability community. The collection highlights progress that’s been made since IDEA went into effect and encourages important conversations about inclusion in education. An informative and a compelling read, it’s on NEA’s Disability Booklist! As we mark these meaningful anniversaries, we must continue to demand that Congress fully fund IDEA for special education students. Learn more at nea.org/IDEA.

The leader of the nation’s largest teachers’ union promises more activism.

www.edweek.org

NEA Grant Secures Florida Win for Collective Bargaining

Florida teacher Lisa Loyd shows off her ballot card—she voted “yes” for a collective bargaining agreement.

An NEA Year-Round Organizing grant helped the Florida Education Association (FEA) protect educators’ rights and preserve collective bargaining.

In 2023, Gov. Ron DeSantis signed a law that banned payroll deductions for union dues and placed an onerous new requirement on most public employees, including educators, to maintain a 60 percent membership rate within their bargaining unit to avoid mandatory annual recertification elections.

Today, FEA is celebrating its 117th straight recertification win—clear proof that Florida educators stand with their union! To date, FEA has had no recertification losses. Learn about NEA organizing grants at nea.org/YROGrant.

NEA Urges Colleges to Adopt Safe Zone Policy

College campuses should be safe places for immigrant students and staff, but today, these communities are at risk. NEA’s Office of General Counsel recommends colleges and universities adopt Safe

NEA Challenges Wyoming Voucher Scheme

NEA and the Wyoming Education Association filed a lawsuit, in June, challenging the state’s \$50 million universal voucher program, which allows any student to use public funds to attend private—often religious schools or homeschools—regardless of family income.

The lawsuit argued that the “Steamboat Legacy Scholarship Act,” a voucher

scheme by another name, siphons money from public education and violates constitutional protections for a uniform, publicly funded education system. In July, the court indefinitely halted the voucher program.

NEA Position Echoed in Supreme Court Decision

NEA protected public education by filing an amicus brief with the U.S. Supreme Court, in April, urging the justices to reject efforts to force states to fund religious charter schools.

In a major win, in May, the Court upheld the principle that public dollars must support public—not religious—schools.

Learn more at nea.org/Vouchers.

Build futures beyond the horizon

Manufacturing shapes our world, offering limitless opportunities for students to innovate, grow, and leave a lasting impact. From welding and machining to robotics and engineering, the variety of manufacturing careers is vast, each offering unique ways to make a difference. These careers seamlessly blend technical expertise with creativity, paving the way to stability and fulfillment.

Among these diverse options, maritime manufacturing stands out as an especially immersive field, providing opportunities for innovation and meaningful contributions. Empowering students to build the next generation of U.S. Navy submarines and surface ships – marvels of advanced technology and meticulous craftsmanship – can lead them to engage in groundbreaking projects that redefine what’s possible.

Your encouragement can spark this journey. Inspire students to explore the endless possibilities within maritime manufacturing.

NEA SALARY REPORT: THE LATEST ON EDUCATOR PAY

The average teacher in the U.S. earned a little more than \$72,000 last year—a 3.8 percent increase over the previous year, according to NEA's annual educator pay reports. That's the good news. The bad news? Adjusted for inflation, the average teacher actually makes less today

than she did 10 years ago. Too-low pay is a serious problem, hindering efforts to attract and retain educators. What can you do to help change the equation? Use your voice at the bargaining table, and elect lawmakers who respect educators and unions.

Teacher Salaries

National Average Teacher Salary:

(2023 – 2024)
\$72,030

(2022 – 2023)
\$69,381

National Average Starting Teacher Salary:

(2023 – 2024)
\$46,526

(2022 – 2023)
\$44,458

But, when adjusted for inflation, average and starting salaries are below 2008 – 2009 levels.

The Collective Bargaining Difference:

24% MORE

Teachers earn 24 percent more on average in states with collective bargaining than in those where it is prohibited.

School Support Staff Earnings

National Average Earnings for Education Support Professionals (ESPs)

Higher Education:

(2023 – 2024)
\$45,662

K-12:

(2023 – 2024)
\$34,954

The number of ESPs who make less than \$25,000:

34.5%

Overall, due to inflation, ESPs make on average 9 percent less than they did 10 years ago.

The Collective Bargaining Difference:

7% MORE

ESPs earn 7 percent more on average in states with collective bargaining than in states where it is prohibited.

IN THE KNOW

U.S. states with the highest and lowest average teacher salaries:

HIGHEST:
California (\$101,084)
New York (\$96,615)
Massachusetts (\$92,076)

LOWEST:
Mississippi (\$53,704)
Florida (\$54,875)
Missouri (\$55,132)

U.S. states and territories with the highest and lowest starting teacher salaries:

HIGHEST:
District of Columbia (\$63,373)
California (\$58,409)
Washington (\$57,912)

LOWEST:
Montana (\$35,674)
Nebraska (\$38,811)
Missouri (\$38,871)

20.7%—The percentage of school districts with teacher salaries that top \$100,000.

96%—The percentage of school districts with teacher salaries over \$100K that are in states with collective bargaining laws.

800—The number of districts with starting salaries of at least \$60,000—a 66.2% increase from the prior year.

HOW FLEXIBLE SEATING CAN BOOST ENGAGEMENT

When the physical education teacher at Colleen Metzler’s Vermont school said there were exercise balls that could be used as classroom seating, Metzler took full advantage of the opportunity—and replaced all of the seating in her fourth-grade classroom.

“I got rid of all of my chairs and only had exercise balls,” she says. “And it was chaos. Because I was in my first year as a classroom teacher, and I had exercise balls that I had no idea how to manage!”

Metzler jumped headfirst into the world of flexible seating and learned a lot from that first experience. Now, her classroom has office chairs, wobble chairs—and the exercise balls that began her journey.

“As the year went on, I slowly started adding regular chairs as another option,” she says.

While flexible seating may have become more popular in schools, it may not be for everyone. But some elementary school teachers have noticed that it increases student engagement and reduces behavioral issues.

Metzler said having these options can make her fourth graders feel more mature, and thus they take things more seriously. “I’m trusting that we can have these different seats in our classroom and that we can take care of them, and we can still attend to our learning. They take that very seriously,” she says. “It builds confidence.”

Flexible seating can include anything from a wide variety of classroom chairs to the way chairs and desks are arranged to the types of desks, such as standing or sitting desks.

Metzler’s advice to teachers who are exploring flexible seating? First test how much movement you can tolerate in the classroom before getting distracted or compromising your lessons. “We want students to move, and we want them to get their energy out,” she says. “We also don’t want to become so distracted that that’s the only thing we can see when we’re teaching.”

—KALIE WALKER

Learn about flexible classroom seating at nea.org/Seating.

Support for “Bell-to-Bell” Cellphone Bans is Growing

Nationwide, more school districts have adopted restrictions on student cellphone use, often mandated by new state laws. The laws often apply only during instructional time, but some districts are extending these policies to the entire school day—so-called “bell-to-bell” bans. A Pew Research Center survey found that public support for both types of bans is on the rise.

How Are Educators Using Artificial Intelligence in the Classroom?

Only 32 percent of teachers report using artificial intelligence (AI) at least weekly, while 28 percent use it infrequently, and 40 percent don’t use it at all, according to a recent Gallup survey. For those who use AI monthly, the most common uses include:

- Preparing lessons (37%)
- Creating worksheets (33%)
- Modifying materials to meet students’ needs (28%)
- Doing administrative work (28%)
- Making assessments (25%)

Less common applications include grading (16%), providing one-on-one instruction (14%), and analyzing student data (12%).

SOURCE: GALLUP

Teachers’ intention to leave current job

SOURCE: THE RAND CORPORATION

Fewer Teachers Planning on Leaving Their Jobs

Burnout and low pay affect educators across the nation, pushing many of them to leave the profession or at least seriously consider doing so. Teacher retention has always been a challenge, but the factors and conditions that have driven so many out of the classroom were worsened by the COVID-19 pandemic.

In 2025, there may be signs of progress. According to a new survey by the RAND Corporation, teachers overall are less likely to leave their jobs. However, Black and Hispanic educators are more likely to report an intent to leave compared with their white counterparts.

“Managing behavior takes a real toll—physically, mentally, and emotionally. We give so much to our students and their families. If schools are serious about implementing restorative justice, they need to understand that it’s not just students being affected—these challenges are hurting the adults, too.”

— Candice Pastor, teacher, Montclair, N.J.

Learn how educators are demanding the tools and resources necessary to protect students and school staff from behavior that could turn violent at nea.org/SafeInSchool.

50 YEARS OF THE INDIVIDUALS WITH DISABILITIES EDUCATION ACT

By Kalie Walker and
Amanda Litvinov

Jean Crockett knows very well how the Individuals with Disabilities Education Act (IDEA) transformed life for students with disabilities. When she was an elementary school teacher in the 1970s, she had a student who was non-verbal and would make loud vocal sounds during reading time.

"Fortunately, it was 1978, and the regulations in IDEA came into effect," Crockett says. She referred her student

to the school psychologist, who placed the student in a class where he received the support he needed.

Before IDEA, there was no measure of whether students with disabilities were receiving an appropriate education—if they were in school at all, says Crockett, now a professor emerita of special education at the University of Florida.

But that all changed when the Education for All Handicapped Children Act was signed into law in 1975 (it would be renamed IDEA in 1990). The law mandated that students with disabilities would not be turned away from their public school.

While the law was transformative for students with disabilities and their families, and ushered in a new era of

inclusion in public schools, the full potential of the law has never been reached.

Will we move forward or backward?

From the start, IDEA stated that the federal government will pay up to 40 percent of the average per pupil cost for special education students. But the federal contribution has never come close to that—it's currently just 12 percent.

Two Trump administration proposals could make the situation even worse.

In the administration's efforts to dismantle the Department of Education, it has cut more than 1,400 employees and proposed that IDEA be managed by the Health and Human Services agency, which has no experience protecting the rights of students with disabilities.

Trump's stated intention is to "move education back to the states" by converting formula grants into block grants—with little to no federal oversight. This would make it much less likely that IDEA funding will reach the students it was intended to help.

"States would not have to answer to anyone about whether they are following the law," says Tom Zembar, NEA's education policy and practice manager.

"As a result, students in some states could receive needed services while students in others receive none," he says.

NEA has taken legal action to block the destruction of the Department of Education and supports a bipartisan push in Congress to fully fund IDEA. Read on to find out how you can help. 🗳️

IDEA: Important, Imperfect, and Imperiled

STUDENTS SERVED

7.5 MILLION

That's how many students received special education services through public schools in the 2022 – 2023 school year—about 15 percent of all public school students.

FEDERAL FUNDING PROMISE

40 PERCENT

When IDEA passed 50 years ago, the federal government committed to pay 40 percent of the average per student cost for every special education student. It has never met that commitment.

ACTUAL FEDERAL FUNDING

12 PERCENT

The federal share of the average per student cost was under 12 percent in 2025, the smallest share since 2000.

(CONGRESSIONAL RESEARCH SERVICE)

FUNDING SHORTFALL

\$38.66 BILLION

That's how much states and districts across the country had to cover in the 2024 – 2025 school year, because the federal government fell so short on funding IDEA.

(CONGRESSIONAL RESEARCH SERVICE)

HOW MUCH DOES SCHOOL SUPPORT STAFF GET PAID?

FIND OUT WHICH STATES PAY THE MOST, THE LEAST, AND HOW YOUR PAY COMPARES

By Tim Walker

Danielle Jones is a special education instructional assistant in Virginia’s Arlington County schools. She has been in her current position for seven years and has worked in education for 21 years. Jones has a bachelor’s degree and is halfway to earning her master’s. She works a second job as a speech and debate coach and has a roommate, like many support staff in the district.

But some colleagues are facing even greater financial pressures. “We have people who are receiving housing assistance, we have people who are on food stamps. The pay is just not enough to make daily ends meet,” Jones says. “We are all dedicated professionals, but it is getting difficult to bring 100 percent, especially if you have to work another job. It’s exhausting and it leads to burnout.”

In 2024, NEA surveyed school support staff, also known as education support professionals (ESP), and found that low pay is a “moderate or serious” concern for 90 percent of those who work in K–12 schools. Thirty-seven

percent hold a second job, and one-third have a moderate or serious problem buying food. Many respondents also reported that they skip routine or preventive doctor appointments to avoid compounding financial strain. Staff shortages are widespread and will only worsen, Jones says, unless improvements are made.

Danielle Jones

“If people can’t really survive on the low pay, the staff turnover, the shortages will only get worse. These are dedicated people, but how do [you] continue if you’re thinking your food stamps won’t last to the end of the month?”

ESP earnings don’t keep up with inflation

The annual “Education Support Professional Earnings Report” provides a pay breakdown for support staff in K–12 public schools and higher education.

According to new NEA data, almost one-third of all ESPs who worked full-time in 2023 – 2024 earned less than \$25,000 per year; and 10 percent earned less than \$15,000.

The Benefit of Collective Bargaining

ESP

Bargaining laws cover ESPs	\$38,554
Bargaining is prohibited	\$35,879
No bargaining law, but limited bargaining takes place in some states	\$34,623

Average salary, 2023 – 2024. Salary averages are weighted by the number of ESPs. Where no bargaining law is in place, the amount of bargaining will vary significantly depending on the state.

SOURCE: NEA ESP EARNINGS REPORT, APRIL 2025

ESP Earnings Lag Inflation

Overall, ESPs make on average 9 percent less than they did 10 years ago, adjusted for inflation.

SOURCE: NEA ESP EARNINGS REPORT, APRIL 2025

Of the approximately 2.2 million support staff working in K–12 public schools, 34.5 percent made less than \$25,000 in 2023 – 2024. The previous school year, 38 percent earned less than \$25,000. Within higher education, 12.6 percent of support staff earn less than \$25,000, and 6.2 percent earn less than \$15,000.

The report also found that the average wage for a full-time ESP was \$37,097—only a \$1,000 increase over

the previous year. Higher education earnings came in at \$45,662; K–12 at \$34,954. For K–12 ESPs, that’s an overall increase from \$31,190 in the last 10 years. When adjusted for inflation, however, average earnings have declined to \$28,318 in real 2015 dollars over the past decade.

According to the report, Rhode Island had the highest average K–12 ESP full-time earnings at \$42,940. Full-time earnings were above \$40,000 in eight states—Alaska, California, Connecticut, Delaware, Hawaii, New Jersey, New York, and Rhode Island—and the District of Columbia.

Oklahoma had the lowest average K–12 ESP full-time earnings at \$27,656. The average K–12 ESP full-time earnings were below \$29,000 in four additional states—Idaho, Kansas, Kentucky, and Mississippi.

The collective bargaining difference

ESP

Launch an ESP Bill of Rights campaign in your state

Find sample bargaining language, sample legislation, webinars, and all the tools you need for a successful campaign at nea.org/ESPBillofRights.

average, \$38,554. Those who work in states where collective bargaining is prohibited earn, on average, \$35,879, a 7 percent difference.

In 2024, bargaining power fueled a major victory for paraeducators in Andover, Mass., where Karen Torres has worked as an instructional assistant for 17 years. A hard-fought new contract has lifted starting pay from \$24,537 to \$39,142 per year. By the end of the 4-year contract, the highest paid employee will earn \$50,103.

Torres is the 2024 Massachusetts Teachers Association ESP of the Year and a key member of the Andover Education Association bargaining team. She says her job has changed significantly over the years.

“That is mostly due to increasing student needs—the academic demands and the behavioral and social emotional needs—which are nothing like they were a decade or so ago,” Torres says. “But the compensation just has not kept up, and it’s unacceptable.”

‘Show us that respect’

A living wage is a central pillar of NEA’s national ESP Bill of Rights campaign. Calling on lawmakers to invest in school support staff, the campaign outlines the top 10 most pressing concerns of ESPs. These include a living wage, adequate health coverage, paid leave, professional training and education, and a safe and healthy work environment. Massachusetts, Virginia, and 12 other states have launched the campaign.

“We’re working very hard in getting elected officials to stand behind us,” Torres says. “Pay us what we are worth, show us that respect.” ✨

MEET THE IDAHO TEACHER WHO REFUSED TO BACK DOWN

"We (help students learn) by making them feel safe. We do that by ... making sure that they know they are all welcome."

—Teacher Sarah Inama, in an interview with *Idaho Education News*.

The classroom poster that led to international headlines and Sarah Inama's resignation says four words: "Everyone is welcome here." Under that message, 10 illustrated hands appear in skin tones that range from dark brown to pale pink.

The message is straightforward: Whether you're Native, Asian, Black, Hispanic, white, or some combination of the above, you are welcome in this class. This teacher values you.

For kids who don't need to hear that message, the poster probably blended into the background, says Inama, a world civilizations teacher. But for some students, the message needs to be seen. "If [the hands] help some students know that I'm a teacher who wants everyone to feel welcome, then that's why I have them up," says Inama, who was working at Lewis and Clark Middle School, in Idaho's West Ada School District, at the time.

Without the hands, the poster would not have been a problem, the district's chief academic officer told Inama. But with the hands, it violated a district policy requiring all classroom displays to be "content neutral."

Public schools welcome everyone

In May, Inama resigned from her district because of the poster—or really, because of what the poster revealed about the people she worked for.

The real cliffhanger in Inama's story came months earlier, when she first took the poster down at her principal's request. Right away, she asked herself, why am I doing this? What kind of message does this send to my students? Aren't public school teachers supposed to welcome everyone? Isn't that essential to a public education?

These are questions that many NEA members across the U.S. are asking these days, as anti-diversity, anti-inclusion laws take hold in many states. But based on the thousands upon thousands of emails sent to Inama and to West Ada school board members, most Americans already know the answer: They want educators to embrace and value all students. They want their children to have teachers like Inama.

There was no good reason

Nobody actually complained about Inama's poster. Ever. It only caught her principal's attention in January after parents at another West Ada school complained on social media about a bulletin board with rainbows on it. After the district removed that bulletin board,

Chief Academic Officer Marcus Myers told all district principals to "open your eyes to what's hanging on the wall," according to Myers' interview on *The Ranch Podcast*.

In late January, Inama's principal came to her classroom during lunch and told her to take the poster down. Inama recalls feeling "very, very sad." But she did as she was told, and set the poster aside on a table at the back of the classroom.

Her principal told her: "We're just trying to protect you if something were to happen."

But Inama wasn't so sure. "It seemed like they were trying to preemptively appease somebody with exclusionary beliefs," she says.

When her students spied the poster on the table, they asked Inama why she took it down.

"I was just like, 'I don't even know,'" she recalls. Inama realized she didn't have a reason. Any reason she gave would sound racist and hurtful to the non-white kids in her classroom.

"I literally felt like I had let them down," she reflects. "I was thinking, 'I don't agree with this.' To me it's blatantly discriminatory and it's blatantly allowing people with exclusionary views to affect my classroom and my students. And I felt sick about [my students] even knowing that."

Inama knows her students trust her. She works hard to build relationships with them. When she looked at their faces and heard their questions, she thought, "I'm doing them such an injustice by being complacent. Whatever reason the district has, I don't agree with it."

So, one weekend in early February, Inama returned to school with her husband and her 1-year-old baby, and she put the poster back up.

Sarah Inama's students signed the back of the poster that she was forced to take down. (Opposite) Inama's "controversial" poster.

do that by building relationships with them. And, most importantly, we do that by making sure that they know that they are all welcome. ... With that being said, I have put my sign back up."

Today, when Inama thinks about sending that email to her principal, her frustration returns. "These are people's kids who we promised to care about and teach," she says.

Her principal told her once again to remove the poster, or else she would be considered insubordinate, and he would get district-level officials involved. She didn't—and they did.

In late February, the chief academic officer and the district's legal counsel told her that the poster violated the district policy as well as the state's 2021 ban on critical race theory. ✨

— MARY ELLEN FLANNERY

'These are people's kids'

Then she emailed her principal, saying that his request to remove the poster "goes against everything that we work towards and the type of community that we dream to have at our school. Is not everybody welcome here?"

In an interview with *Idaho Education News*, Inama said, "We (help students learn) by making them feel safe. We do that by making sure they have food. We

What happened next?

In the end, Inama resigned. After going back and forth with the principal, the superintendent, and the people at the district office, she came to a realization: "It's hard to work for people who you feel are fundamentally immoral," she says.

Inama was sorry to leave her students in the West Ada School District, but she found a new job. Last spring, educators in nearby Boise had turned out to support Inama, wearing T-shirts that said, "Everyone is welcome here." This fall, she joined them as a junior high world studies teacher.

A PASSIONATE COACH FOR SPECIAL OLYMPICS AND UNIFIED SPORTS

By Kalie Walker

If I can help somebody, if I pass it along, then my living shall not be in vain," sang famed gospel singer Mahalia Jackson.

Retired educator and track coach Thomas Harrington lives by this lyric from the song "If I Can Help Somebody" — especially when it comes to motivating students.

Harrington taught health, physical education, and swimming for 37 years in Trenton, N.J. He also coached champion high school track teams and served as an assistant women's track coach for 11 Ivy League championship teams at Princeton University.

"Like the classroom, if you can get the students to believe that, first of all, you do care about them, and, two, get them to trust you, you can do phenomenal things with any athlete, any level," he says.

Harrington brought this philosophy to a new group of young people in 1986, when a friend encouraged him to start training athletes for Special Olympics track and field competitions.

"I've always come from the point [of view] that the greatest learning comes from the educator meeting the student where they are and moving them up," he says.

His involvement continued for decades and, in 2014, Harrington served as the athletics commissioner of the Special Olympics USA Games, in New Jersey. The next year, when Special Olympics organizers were looking for someone to run the Unified track program in his state, Harrington was the natural choice. A branch of the Special Olympics, Unified Sports connects students and athletes with and without intellectual disabilities and puts them on the same sports team.

(Left) Thomas Harrington with track athlete Destiny Gerety (in yellow) and her coach, Kristi Clave; (below) Harrington at the 2022 Special Olympic USA Games, in Orlando, Fla.

"It creates a bond quite often between the athletes and the partners," Harrington says.

His program started with just a few events, but now has a state championship. "Unified events are in just about every school and track meet now in New Jersey," he says. "You know what? That's my baby."

Harrington retired from teaching in

2017, but his work with Special Olympics continues. He serves as the meet director every year for the Summer Games, and, in 2022, he designed the first-ever Unified Athletics track and field competition to be held at the USA Games. Today, he serves as Unified track and field director for the 2026 Special Olympics USA Games.

Harrington's dream is to see worldwide Unified games as part of Olympic sports. "It doesn't matter what your ability or disability is," he says. "Last time I checked, we all had hearts, and they beat the same way. If people look at people with their heart and not their eyes, that's where unity starts." 🍯

DISCOVER THE LATEST BUZZ ABOUT HONEY

PRAISED for its amazing ability to heal the body, the ancient "nectar of the gods" may just be a 21st century healing miracle — the closest thing we have to a "cure-all" for dozens of ailments from heart disease and heartburn to insomnia, low libido, fatigue, cough and cold, headaches, and more.

If you're a weight-loss warrior, this gooey, golden syrup can even help flatten your belly and whittle your waist!

Surprisingly, 50% of Americans have this nourishing nectar in their kitchen cupboard. Chances are, you do, too, but you haven't even begun to tap into its healing powers. More than a sweetener for tea and toast, **this ancient superfood has been scientifically shown to help:**

- 🍯 Prevent blood sugar swings
- 🍯 Stop Insomnia
- 🍯 Improve regularity — no constipation
- 🍯 Heal cuts and scrapes
- 🍯 Ease asthma and allergies
- 🍯 Ease tension
- 🍯 Send pain packing
- 🍯 Blast body fat
- 🍯 Relieve heartburn
- 🍯 Fight wrinkles
- 🍯 MUCH MORE!

SWEET
FACT

1.31 POUNDS
Approximate amount of honey each person in the U.S. consumes every year.

Nature's honey. Yes — the same honey that comes from a flower's nectar consumed by the honeybee. In her book, **The Healing Powers of Honey**, bestselling author Cal Orey draws on interviews with doctors, researchers, and beekeepers to reveal the true power of this golden nectar.

Not all honey is the same . . .

Before you start plucking honey from your cupboard and adding it to your food or downing it by the spoonful, order your **FREE COPY** of **The Healing Powers of Honey**.

Inside your **FREE BOOK** you'll discover 30 different healing varieties of honey — each with unique and remarkable "do your body good" powers. For example: Researchers at the Universiti Sains Malaysia reported dozens of studies found tualang honey can **halt the growth of some cancer cells**.

SWEET
FACT

2 MILLION
Number of flowers it takes for honeybees to make 1 pound of honey.

Then there's the popular manuka honey, which can help you **beat antibiotic-resistant MRSA and staph bacteria**. Research shows manuka has a high antibacterial potency — great for treating skin infections and aiding digestion. But . . .

There's one little trick you must know before you use it. Make sure it's medical-grade manuka honey. Find out how to tell if it's the real deal in **The Healing Powers of Honey**.

And when you want to increase the number of healthy antioxidants in your body . . .

Try buckwheat honey. One study showed healthy men who drank water with buckwheat honey had a 7% boost in their antioxidant levels. This isn't the only honey to power up antioxidant levels. Discover the two other varieties on page 74 of your copy. **(Hurry, claim it today before all the FREE copies are gone!)**

The Healing Powers of Honey doesn't just give you the buzz on one, two, or three varieties of honey. Nope, it gives you the scoop on **30 different healing varieties** so you know exactly which one, how much, and how to use it for what's ailing you.

Wait until you see how much healing with honey is packed inside this breakthrough book . . .

DEDICATED EDUCATOR RECEIVED NEA-RETIRED'S HIGHEST AWARD

I was always one of those high school students who had to get involved in things. ... I was nosy, so what better way than to get involved?"

These were the words of Shirley George, some 30 years ago, as she took the reins as president of the Education Association of Norfolk, in Virginia. Since that time, her passion for standing up for students and serving her state and national associations has never waned.

For her decades of service and selfless dedication, George received NEA-Retired's highest honor, the Distinguished Achievement Award, presented at the NEA-Retired Annual Meeting this summer.

As a special education teacher, George recognized the importance of every education support professional (ESP), from her aides to those who drove her students to school. Connie Coates, an ESP whom George mentored, says George encouraged her to run for president of her local association, which led to additional leadership roles with the Virginia Education Association (VEA).

Shirley George

Over the years, George has served in leadership positions with her local, as well as with VEA, VEA-Retired, and NEA. She has also been an avid PAC fundraiser and membership recruiter.

Former VEA Vice President Jeff Cobb

recalls how George was a "positive and vital force" for retirees, especially in Virginia Beach. As a Uniserv director, later as chair for Congressional District 2 in Virginia Beach, and then as a retiree, George has lobbied the state's General Assembly relentlessly. Her advocacy has focused on retiree pensions, equity in insurance reimbursements for retired ESPs, and issues affecting the lives of active members.

In support of George's nomination, VEA-Retired Council President Lola McDowell wrote: "Shirley is a truly exceptional member and advocate who has dedicated her life to the support of public education in so many ways!"

—KATHY DAVIS, SECRETARY-TREASURER, VEA-RETIRED

Announcing the 2026 NEA-Retired Communications Award!

Every year, the NEA-Retired Executive Council Communications Committee recognizes NEA-Retired affiliates for outstanding communications work. The following awards are presented to affiliates in two categories: Membership of more than 2,500, and membership of less than 2,500.

- **Established State Retired Newsletter** (Published more than three years)
- **State Retired Newsletter** (Published fewer than three years)

- **Established Local Retired Newsletter**
- **E-newsletter**
- **State Retired Website**
- **NEA-Retired Spotlight Award** (State active newsletter/magazine covering NEA-Retired issues)

The **Newsletter Hall of Fame** award has only one winner.

To apply, visit nea.org/CommAwards. Applications must be postmarked by April 15, 2026.

NEA-Retired Membership Awards

NEA-Retired is the fastest growing membership category in the NEA family! At the NEA-Retired Annual Meeting this summer, Membership Committee Chair Meg Gruber commended the more than 50 members of the committee. "These hard-working members make miracles happen each and every year by bringing new members into our program," she said.

Gruber then announced the winners of the 2025 NEA-Retired Membership Awards:

The Retired state group with the largest numerical membership gains is the **Michigan Education Association-Retired**, with 1,471 new members. This year's runner-up is the **Kentucky Education Association-Retired**, with 273 new members.

The state group with the largest percentage increase of new members is the **Michigan Education Association-Retired**, with a 3.92 percent increase. The

runner-up is **Education Minnesota Retired**, with a 2.4 percent increase.

The "Spirit of Membership Award" has been renamed the "Tom Wellman Spirit of Membership Award" in honor of the former committee chair, who died last year. "Tom created this award to recognize the work of associations in not only increasing membership, but also increasing engagement," Gruber said. "He knew our associations and chapters would not grow and thrive without members who believe in our mission and vision."

This year's winner is the **Delaware State Education Association-Retired**, which reached out to members and potential members through social media, newsletters, and phone calls. The association also collected school supplies, lobbied legislators, and ran clothing drives with Aspiring Educators, among other activities.

We're All Fired Up!

NEA-Retired members are a powerful voice for change—and they refuse to be silenced.

By James Paterson

Our nation's public schools, students, and educators are facing historic threats to funding, academic freedom, and equity. Many retired educators are pushing back—organizing, protesting, and advocating, to protect our schools. Here, you'll meet some of NEA-Retired's inspiring change-makers.

Shaking things up in Montana Moffie Funk

Families invited her in on frigid Montana mornings when she was knocking on doors and first running for the State House. Then there were the people who offered her a cool drink on the porch on hot afternoons. They all made Moffie Funk feel good about running for office, especially as they chatted about important issues. These connections led the former middle school social studies teacher to three successful bids for the state office. While she left elected office in 2023 due to term limits, she is still out there shaking hands with voters.

"I still knock on a lot of doors. That's what I do to stay sane," she says.

Funk's passion for activism started way back in her college days. Later, when she became an educator, union leadership was a natural fit for her.

"One of the first things I did as a teacher was join the union," she says. "I believe with all my heart that the only way forward, on a number of levels, is to increase the power of unions."

Education has been under attack in Montana on many fronts, Funk says, but she's particularly concerned about privatization of education and a critical public school funding formula that is undergoing a mandatory 10-year review in the state legislature.

"We're sort of consumed by school funding here," she says about Montanans Organized for Education (MOFE), a group she founded, and for which she is now the executive director.

Through MOFE's network of some 12,000 active members—and with a newly formed political action committee—the organization is lobbying for changes to unfair, population-based and "strings-attached" funding for small, rural school districts. Infrastructure is crumbling in many of these schools, and they need more support for special education, Funk explains.

"Our group was also formed to push back against efforts to funnel scarce public resources to unaccountable, for-profit institutions," she

"I believe with all my heart that the only way forward, on a number of levels, is to increase the power of unions."

—Moffie Funk, retired educator and former state legislator, in Montana

(Left) Moffie Funk at the Montana State Capitol, where she advocates for funding for rural schools and against voucher schemes; (below) Bonnie Augusta, on left, and Pat Schmidt at a Lobby Day event in Wisconsin.

notes, pointing to the efforts of some conservative political organizations to siphon public school funding into charter schools and vouchers.

Funk also works to gain local support for pro-public education legislators. One of her top goals is to get young people more active in education issues.

"I sleep at night because of the young people," she says. "A few years ago, it was just us gray hairs at rallies and meetings. ... Now we see more young people concerned about their education and building a clean and healthy environment. That inspires me."

A dynamic duo in Wisconsin Patricia Schmidt and Bonnie Augusta

Patricia Schmidt and Bonnie Augusta sat next to each other about two years ago at an NEA-Retired Annual Meeting, and something clicked.

"Bonnie and I hit it off right away," Schmidt says. "She comes from Madison, and I come from Wautoma. It's definitely a city-mouse, country-mouse relationship, but we really get along."

The pair teams up to train others to be more effective advocates for public education, and to meet with legislators

and community members. "We have learned a lot from each other," Schmidt shares.

Last year, they worked with other members of the Wisconsin Education Association Council-Retired (WEAC-Retired) to re-elect U.S. Sen. Tammy Baldwin.

The two were also part of a successful push by educators to pass a referendum to end gerrymandering in Wisconsin, which *Newsweek* had ranked as the worst state for the practice.

A turning point in Schmidt's activism came when she was still teaching, and WEAC requested that

she lobby a Republican congressman.

"It made an impression on me, seeing this fundamental part of our political process work—and it paid off with his support and interest in our schools, which he visited four times," she recalls.

This summer, Schmidt and Augusta ran an NEA Leadership Academy training for WEAC-Retired members. The goal? To inspire members to advocate for key issues like voting rights.

"First, we want them to hold a sign at a demonstration, then write letters or make calls, and

"Sometimes all we make are small gains. But I know activism brings about important, positive social change over time."

—Hilda Kendrick-Appiah, retired educator and activist, in Indiana

then meet with legislators. It is a progression but once you do it, you are committed," Schmidt says.

What keeps the pair going? Augusta says: "My mother always said we should leave things better than we found them. I think that's our motivation today."

Fighting for equality in Indiana

Hilda Kendrick-Appiah She refused to call President Donald Trump's budget bill by the name he'd given it.

"I'm furious about this big ugly bill," said Hilda Kendrick-Appiah, after Congress passed Trump's so-called "Big Beautiful Bill."

She adds, "I was constantly contacting legislators to urge them to vote against it. Now I'm going to start to work to elect new ones."

Kendrick-Appiah retired in 2021 from the Greater Clark School District, in Jeffersonville, Ind., but public education is still a top priority for her.

In the 2022 elections, she campaigned for candidates door-to-door and helped arrange transportation to the polls for 15 hours straight. She now intends to turn that energy to the 2026 elections and to advocating directly for education issues.

"I think I learned about activism when I was still in the womb," she jokes, noting that she comes from a union family.

But her urge to fight racial insensitivity was cemented

Indiana's Hilda Kendrick-Appiah gets out her message by knocking on doors and meeting with lawmakers, like former U.S. Rep. Trey Hollingsworth (right) and staffer Connor Lentz.

when, as a first-year teacher and the lone Person of Color in her school, she heard a student make a racist remark.

"I realized then I wanted to get others to see that, in the words of President Obama: 'We are one American family, all deserving of equal treatment,'" she says. "I believe in that."

"Sometimes all we make are small gains," she notes. "But I know activism brings about important, positive social change over time."

Teaching lessons from history in Oregon

Marleen Wallingford "History keeps repeating itself. The targeted groups are different, but the marginalization and injustices are familiar," says retired school speech and language pathologist Marleen Wallingford. "There is still the 'othering' of people that aren't like the majority."

Wallingford works to educate the public about the inhumane incarceration of Japanese Americans in the 1940s—which included

members of her family. They put people in detention camps who really weren't a threat, Wallingford says. "Three-quarters of them were citizens," she adds.

Wallingford is a docent at the Japanese American Museum of Oregon, in Portland; and is active with organizations that raise awareness about the treatment of Japanese Americans at that time.

Wallingford noted that the detainment of Japanese citizens was prompted by former President Franklin D. Roosevelt's implementation of the Alien Enemies Act of 1798, which President Trump is now using as he detains and deports immigrants.

"There is much that is the same about the treatment these people are receiving," she says, noting that she has participated in several protests about the current treatment of the immigrant population.

When her family was detained, an overzealous military leader rounded up some 125,000 Japanese Americans and held them in miserable

Oregon retiree Marleen Wallingford (second from right) helps clean up Portland's Chinatown. She also educates the public about the detainment of Japanese Americans in the 1940s.

"History keeps repeating itself. The targeted groups are different, but the marginalization and injustices are familiar. There is still the 'othering' of people that aren't like the majority."

—Marleen Wallingford, retired educator and activist, in Oregon

conditions in livestock centers and at racetracks. Most were moved to camps in the Midwest, away from their homes. They lost everything.

"Many of those sites ... now try to tell the story of those camps, but with these current initiatives to eliminate diversity, equity and inclusion, the message may change. Now the current story of what's happening to immigrants is also being covered up," she says.

"I want the story of Japanese Americans in this country to be better known, but it is also important to me to try to assist those who today also are victims of such poor treatment."

Showing Up in California

Orval Garrison "I have inhaled more than my share of tear gas," says retiree Orval Garrison of his days protesting the Vietnam War. "I knew [the war] was unjust and got involved in protests. ... There are issues that are just as important today."

Over the past six decades, advocacy has continued to be a primary focus for Garrison, who taught in Southern California and is a former president of the California Teachers Association (CTA)-Retired. He still attends school board meetings and expresses his views about education policies in Fortuna—the rural region in northwestern California where he now lives.

"Hopelessness is not new in our nation. There was a sense of hopelessness ... during the two world wars, and throughout the Great Depression," Garrison reflects. "We felt it during the 60s. And now there is a sense of hopelessness and creeping movement toward autocracy."

But he still believes the pendulum can swing back. He sees an invigorated citizenry

in his region, where more than 3,000 people showed up for the "No Kings" march in June—that's in an area where only a few hundred people turn out for most protests.

"People are saying 'enough already.' I think the 2026 election will be significant."

Garrison tirelessly makes calls, knocks on doors, marches in protests, and campaigns for local and state politicians. He advocates for issues ranging from state education funding and retired teacher benefits to pushing back against the Trump administration.

He's also active in Indivisible, a national group that focuses on grassroots efforts and works with Latino communities in his region. Through the group he has handed out "red cards"—which outline immigrants' rights—for people to hand to immigration agents, if needed.

He still remembers how, in 1988, CTA succeeded in passing a referendum requiring 40 percent of state funds to be spent on schools.

"Accomplishments like that don't happen because the good fairy sprinkles fairy dust on politicians. They happen through hard, dedicated work from a lot of people. When we show up, we can make a difference." 🌸

The Romance of Riding the Rails

The “friendly skies” are often anything but. Navigating through a maze of stanchions at airport security; being nickled-and-dimed on baggage and extra fees; and squeezing into tight seats? Why must we suffer so to get to our destination? And car travel has its own hassles—namely traffic! Perhaps that’s why more people are discovering the magic of train travel. Whether you choose a budget-friendly day trip or a 20-day trip of a lifetime, the journey is part of the experience.

All aboard to see the USA

SOUTHWEST CHIEF

Retired educator Carol Schnaiter and her husband, Jeff, endured their fair share of road trips and knew the drawbacks of flying, so when it came to visiting the Grand Canyon for the first time, the Illinois natives opted for the A-Train; in this case, the Amtrak Train.

Their ultimate vacation goal was hiking at the iconic

national park, but traveling on Amtrak's Southwest Chief meant they also got to see a vast swathe of the Midwest and Southwest, including Iowa, Kansas, Colorado, and New Mexico.

The trip is long—some 43 hours and 2,000 or so miles from Chicago to Los Angeles—but the good news is that sleep is included!

While many economize and slumber in coach, the Schnaiters sprang for a private bedroom that included bathroom facilities on the westbound portion of their trip. Another option is booking a roomette—a cozy space with a shared bathroom.

“We didn’t have to worry about where we were going

to eat [those who opt for a bedroom or a roomette have dining room privileges], and we weren't tired and desperate to find a hotel room after a day of driving. Our luggage was secure, and we were fully engaged in seeing our beautiful country," Schnaiter says.

While the Southwest Chief continued westward, the Schnaiters disembarked in Williams, Ariz., and boarded a motorcoach that took them to America's beloved national park.

AMTRAK'S FAB FOUR

Many of Amtrak's scenic train routes have observation cars and dining rooms—and come complete with dreamy, nostalgic names. Here are four standouts:

"We didn't have to worry about where we were going to eat, and we weren't tired and desperate to find a hotel room. ... And we were fully engaged in seeing our beautiful country."

— Illinois retiree Carol Schnaiter, who journeyed through the American Southwest by train

Is it time to break up with air travel? Rekindle your love of the journey by sitting back, relaxing, and seeing the world by train.

By Janet Rivera Mednik

COAST STARLIGHT

This scenic journey from Los Angeles to Seattle winds through the snow-capped peaks of the Cascade mountains and along vast stretches of the Pacific Coast. Plus, the train stops in popular destinations like San Francisco, Santa Barbara, Calif., and Portland, Ore.

CALIFORNIA ZEPHYR

This magnificent trip, which starts in Chicago and ends in San Francisco, snakes through vast Midwestern prairies and the majestic Colorado Rockies, and then glides by the shimmering Great Salt Lake, in Utah.

EMPIRE BUILDER

From the hustle and bustle of Chicago to the big skies of Montana to

(Top to bottom) A glass-top train snakes through British Columbia, Canada; retiree Carol Schnaiter and her husband, Jeff, traveled from Chicago to the Grand Canyon by rail. Map their route at right.

"That's the beauty of train travel. ... You eat with others, and there's a strong sense of camaraderie when you get off ... for day excursions."

—John Hope, Kansas retiree who took a 20-day trip of a lifetime through Canada

the Pacific Northwest, this legendary route showcases some of the finest natural wonders in the U.S., including the mighty Mississippi River, breathtaking Glacier National Park, and the sweeping North Dakota plains.

PACIFIC SURFLINER

Ditch LA's congested 405 Highway and hop on board this rail ride instead. Feel like taking a dip in the ocean or riding a roller coaster at an iconic amusement park? This trip can satisfy the itch.

Dollars and cents

Fares for these routes vary greatly, depending on availability, time of booking, and other factors, but one-seat in coach might cost as little as \$150, while a bedroom could set you back \$1,500. A short jaunt on the Pacific Surfliner may end up being less than a full tank of gas—about \$35!

Oh, Canada!

ROCKY MOUNTAINEER

Pam Fuelling, a retired educator in Washington state, and her husband, Wayne, are big fans of riding the rails. In both 2011 and 2024, they embarked on a journey with Rocky Mountaineer—a luxury train company offering routes through the Canadian Rockies and the American West.

Retired educator Pam Fuelling (right) dines with her husband and friends aboard a luxury train trip through the Canadian Rockies and Western USA.

While the price tag is steep, the Fuellings felt that first-class amenities made the trip worth every penny. Think plush, heated seats; glass-dome windows that reveal breathtaking views; locally inspired gourmet meals; and outdoor viewing areas where you can breathe in the fresh mountain air. The company also offers stays in comfortable hotels in the heart of destination cities.

"I think seniors in particular would appreciate the comfort and would also benefit from this wonderful learning experience," Fuelling says. "You get to hear about points of interests, history, and local wildlife from the attendants."

Another added benefit: Passengers never have to lug baggage from the train to a hotel. It's all included.

THE CANADIAN

For former Kansas educator John Hope, trains have been a lifelong passion. Last year, he embarked on a 20-day, dream-come-true trip on The Canadian, operated by VIA Rail.

His journey began in charming Halifax, Nova Scotia, and ended in vibrant Vancouver, with unforgettable stops in between.

"It was everything I hoped for and more. Going across the expanse of Canada was like traveling through five separate countries—from beautiful, peaceful prairies to the majestic Rockies," Hope recalls.

"And the amenities on and off the train—gourmet meals, complete with white tablecloths and silverware, and historic hotels—were also top-notch."

He notes that the trip was comfortable for seniors and solo travelers. Hope had lost his wife two years prior. And though he was traveling alone, he never felt lonely.

"That's the beauty of train travel, folks tend to be very friendly," he notes. "Though there's plenty of time to be alone, it also can be quite social. You eat with others, and there's a strong sense of camaraderie when you get off ... for excursions."

Dollars and cents

Trips on the Rocky Mountaineer range from two-day Canadian rail journeys (from Vancouver to Jasper), from about \$1,700, to a 15-day circle, featuring the "Best of the Rockies," for about \$10K.

Fares for VIA Rail trips vary widely, from about \$500 to \$12,000 and everything in between. Pricing depends on the route, selected accommodations,

and excursions, among other factors.

A 20-day, coast-to-coast adventure through Canada, like Hope's, may include stays in Montreal, Quebec City, Niagara Falls, Lake Louise, and more. This ultimate train trip has an equally impressive price tag, running about \$12,000 per person.

More budget-friendly options include The Canadian's four-day journey from

Vancouver to Toronto, which shows off the country's rich geographical diversity as well local wildlife.

And VIA Rail's two-day, two-night route from Winnipeg to Churchill is considered one of the best adventure routes, as the train eventually treks through Canada's tundra. There's even a chance of seeing polar bears and beluga whales. ❄️

Ultimate Bucket List Adventures

If you are really hooked on train travel, these are some of the world's most epic rail journeys. It never hurts to dream big!

The Venice Simplon-Orient-Express—This train's 1920s-vintage art deco cars exude elegance, offering gourmet meals and dedicated steward service. Pro tip: You can never be overdressed on this luxury train, so leave the jeans and T-shirts at home. Several routes are available, including a twice yearly voyage from Paris to Istanbul. Want to book the grand suite? It will set you back six figures!

Rail Tours to Tibet—Experience Tibet's unique beauty and spirituality without worrying about the high altitude (which can top 15,000 feet above sea level). Rail trips from major cities in China to Lhasa, Tibet, come equipped with oxygen supply systems and pressurized cars, allowing passengers to comfortably enjoy views of snow-capped mountains, deserts, lakes, yaks, and other wildlife. There are many rail routes to explore, but a 13-day Beijing to Lhasa train trip with an Everest Base Camp tour will run you about \$2,000 (airfare not included).

Hokkaido Shinkansen—This scenic ride aboard one of Japan's iconic bullet trains offers a thrilling 512-mile journey from the main island of Honshu to Hakodate, on the island of Hokkaido, in just four hours. This technological marvel races through villages and mountains—and even under the sea in the world's longest underwater tunnel, at 33.4 miles long. First-class service includes plush seating and a dedicated host or hostess. A standard seat on the train can range from \$70 to \$150 depending on the train and class chosen.

SALARY SCHEDULE:

Every Step You Take

By Amanda Litvinov

A WELL-STRUCTURED SALARY SCHEDULE IS ALWAYS WORTH FIGHTING FOR!

Stacie Baur knows from experience what a weak salary schedule can do to a career. Baur was hired, in 2012, by the Clairton City School District, in Pennsylvania, along with 14 other teachers. Only four of them remain in the district today.

"Most left within a few years, and mostly due to the low pay," says Baur, a fifth-grade math teacher. "They couldn't wait around to make a salary they could live off of or start a family."

The salary schedule is considered a sacred principle of unionism: It establishes a rate of pay for each position, called the "career rate," earned by those who have mastered their craft. It also defines apprenticeship wages, with "steps" that raise a worker's salary at regular intervals.

Salary schedules are bias-free and prevent discrimination by race, gender, grade level taught, or academic field. But a weak schedule that takes forever to get to the top—like the one Clairton had—can cost educators hundreds of thousands of dollars over the course of their careers.

As recently as 2019, teachers coming into the Clairton district with a bachelor's degree were starting at just \$38,000. Each step on the salary

Stacie Baur

schedule brought teachers only \$500-\$750 closer to the career rate. Then in years 16 and 17, their pay would suddenly increase by \$20,000 each year (these are called "jump steps" for obvious reasons).

When Baur took on the role of president of the Clairton Education Association, in 2017, she knew the local needed to strengthen their very problematic salary schedule.

They had their chance to make improvements when bargaining commenced in 2020.

"We knew we needed better starting salaries, fewer steps, and more valuable steps," explains Baur, who brushed up on salary issues at trainings offered by the Pennsylvania State Education Association.

District negotiators acknowledged that low salaries and the long wait for an enormous raise were pushing teachers out the door. In the end, they agreed to the union's demands, resulting in

tremendous improvements over the five-year contract. Once they reduced the enormous jump steps at the top, they were able to increase the value of all the steps on the salary schedule; raise the starting salary by \$10,000; and reduce the total number of steps to just 11. At press time, the local was back at the bargaining table, working on even more improvements.

Baur's best advice for negotiating a better salary schedule: "First, educate yourself, whether you're a local leader or a member. This is our salary schedule, our money, and we can't educate the district until we understand it all ourselves," Baur says. "Lean on your Uniserv director [a member of your state affiliate staff] for help—we couldn't have accomplished this without ours!"

What does a good salary schedule look like?

Strong and short—that's the best description of an ideal salary schedule. In fact, NEA recommends no more than 10 steps to reach the maximum salary.

Why is that important? A "strong, short" salary schedule moves employees efficiently from entry level to the maximum rate of compensation over a reasonable number of steps.

Look at it this way: Districts want to incentivize educators to stay and grow and eventually become a master of their craft. But do they really think that takes 15, 20, or 25 years? Research shows, it takes around 7–10 years in the teaching field. A good salary schedule reflects that. ✨

PHOTO: COURTESY OF STACIE BAUR

WHEN IT COMES TO SALARY SCHEDULES ... DO THIS, NOT THAT!

For ease of comparison, these salary schedule examples do not include cost of living increases—but by all means, your union should fight for those!

YES
Step values should be as uniform as possible, whether a dollar amount or a percentage.

YES
Consider additional columns or "lanes" on the schedule that encourage advanced degrees and professional development.

NO
Avoid step values that vary throughout the salary schedule. Chaotic schedules hurt educator retention efforts.

NO
Long schedules force educators into extended apprenticeships that districts think will save them money.

NO
Avoid "jump steps"! Enormous increases at the end of the schedule undermine efforts to attract and retain educators. Uniform steps are better.

YES
Keep it short! The fewer steps, the more each step is worth and the sooner your members will reach their "career rate."

SCHEDULE A			TOTAL CAREER EARNINGS OVER SCHEDULE B	OTHER	SCHEDULE B

LEARN MORE

Learn more about educator pay in your state at nea.org/FairPay.

BONUS TIPS:

- TIP 1:** Beware of one-time bonus proposals that don't raise your base pay or boost your pension, especially in lieu of salary steps.
- TIP 2:** Demand competitive entry-level salaries. Drastically low starting pay guarantees higher turnover, which is costly to the district.

TEAR IT & SHARE IT

Post this in your break room and encourage others to learn about salary schedules.

Don't Let Health Care Swallow Your Raise

By Cindy Long

This year, the Fairfax Education Association made history by ratifying its first collective bargaining agreement in nearly 50 years! The groundbreaking contract includes not only a 6 percent pay increase but also improved health-care benefits.

"This agreement transforms our education landscape," said Fairfax Education Association President Leslie Houston, when the agreement was ratified. "It demonstrates what we can achieve through collaboration and sets a new standard for educational excellence in our community."

The union negotiated the big bump in salary to help offset sharply rising health-care costs. What's more, they bargained for a decrease in health-care premiums and out-of-pocket costs, as well as to speed up the district's search for a lower-cost health-care provider. Another major win was the establishment of a joint health-care committee, co-run by the union and the district.

"The idea behind creating this kind of health-care committee is that it will set our members up for many years, giving them the opportunity to choose their own health-care plan and obtain information from the district to create transparency and long-term stability of the reserve," says Cynthia Blankenship, with NEA's Center for Collective Bargaining and Member Advocacy.

Since 2018, the overall cost of living in the United States has increased by 17 percent, but the cost of health insurance in general has increased by 45 percent, according

Leslie Houston

to the Bureau of Labor Statistics (BLS). Some of those skyrocketing costs are being passed to educators. The latest BLS data shows that the average cost of a public school employee's health benefit contributions

(the portion of the premium paid by employees) increased by 14 percent between 2018 and 2022.

According to the latest national salary data, public school teachers' salaries increased only 10 percent in the same time frame. In other words,

health-insurance premiums and the general cost of living are increasing faster than educators' pay raises.

With education budget cuts and a persistent shortage of health-care providers, costs will likely continue to rise. But armed with information, union members can make a difference.

Ask your local affiliate if your union has a health-care committee—and if it has a seat at the table for decisions about health-care programs for school employees. Bargaining for lower health-care costs benefits the entire school community, including the district. ✨

How unions and districts can work together on health care

Everyone in a school district has a shared interest in improving the quality and affordability of health-care benefits. Forming a joint labor-management benefits advisory committee (BAC), allows union and district staff to work together to examine health-care plans, share ideas, and find the best options for everyone. It's a win-win for all parties!

Check with your union and district human resources office to see if a BAC already exists. If not, reach out to your union representative and share these reasons why your union and district should form a BAC, and how to get started.

- A BAC allows members to discuss the health-benefit needs and related financial constraints of employees throughout the year.
- It provides the opportunity for all stakeholders—employer, employee, the health plan, and other vendors—to openly discuss what is and is not working.
- Members of the BAC should have an equal number of employers and employees, but not less than two of each.
- The BAC should survey members, analyze data, discuss details, and proposals, and report out to keep everyone in the school informed.

SHARE THIS

Road Map to Retirement

HOW TO PLAN FOR A SECURE RETIREMENT AT EVERY AGE AND STAGE

By Mark Ashe, AP economics teacher, Maine Education Association

Planning for retirement is inherently difficult. We don't know how long we will work. We don't know exactly how much our pension and/or Social Security will be. We don't know how much we will spend in retirement. And we don't know how long we will live.

So we face the difficult dilemma of balancing how much we take care of "present me" with how much to sacrifice today to take care of "future me." While behavioral economists suggest that human beings tend to put too much emphasis on present me, each of us has our own time bias that we need to be aware of.

The principles below can help you make a more informed decision when it comes to striking this balance.

General principles:

1. Save something.

Before you start socking money away for retirement, be sure you have an appropriate emergency fund. Many experts recommend three to six months of expenses. Keep these

funds in a high-yield savings account—which earns an above-average interest rate—to protect against inflation. Also, prioritize paying off high-interest debts. If you have a credit card balance with a 30 percent interest rate, it probably doesn't make sense to prioritize money for retirement that may, at best, earn 10 percent per year on average.

2. Save in a cost-effective way.

In my experience, many school employees don't realize how terrible their schools' 403(b) plans are, which are rife with low-performing, high-cost investments.

For example, I showed an elementary school teacher that even though she had chosen a good mutual fund from her 403(b) provider, the provider charged an outrageous fee of 1.25 percent every single year. This may not sound like a lot, but over 30 years of putting away \$200 biweekly at a 7 percent annual rate of return, this fee would mean a loss of well over \$100,000!

If your school district doesn't offer a high-quality 403(b) plan, consider putting in just enough to get your employer's match (if they offer one) and consider putting the rest of your retirement investments in a Roth IRA (check IRS contribution and income limits) and/or in a regular (i.e. taxable) investment account. Either way, consider sticking with low-cost index funds for your investments.

3. See a fiduciary.

Whether you're just getting started or think you are ready for retirement, consider seeing a fiduciary for a financial checkup. A fiduciary can help evaluate your

specific situation and what you can do to achieve your goals.

4. Automate.

We all struggle to keep up routines. Make life easier and have your investments automatically deducted from your paycheck or bank account each month.

20–30 years old

1. Consider investing in stocks.

While stocks aren't for everyone, younger people should know that the worst 30-year return in the U.S. stock market since 1926 was an average annual rate of 7.8 percent—and that time span included the Great Depression, when the stock market fell more than 50 percent.

We don't know the future, but investing \$200 biweekly at 7.8 percent for 30 years would yield a portfolio of more than \$600K.

2. Keep it simple. Depending on your risk tolerance, consider investing in a total stock market index fund that includes international stocks, or a target-date fund that automatically gets more conservative as you get closer to retirement.

3. Embrace market downturns.

Historically, the market has always recovered from a crash, and many of us have made the mistake of stopping our contributions or selling investments during a market crash. However, these have been incredible opportunities for investors.

"While behavioral economists suggest that human beings tend to put too much emphasis on 'present me,' each of us has our own time bias that we need to be aware of."

—Mark Ashe

complicated, but it gives you more options when drawing income from your portfolio in retirement because sometimes international stocks go up when U.S. stocks go down, and sometimes bond funds go up when stock funds go down. This may help protect your retirement plan from being sidetracked by a declining market.

3. Pay off high-interest debt.

It's best to pay off credit cards and other high-interest debt. But carefully assess whether or not you should pay off a mortgage with a low interest rate (below 5 percent), as keeping your mortgage can help avoid cash-flow problems in retirement (especially if your investments can earn at least 5 percent). It is hard to pull money out of a home to buy groceries compared with selling a stock or bond fund.

Planning for retirement can feel like trying to hit a moving target. But regardless of what career stage you are in, taking just one meaningful step can help you feel more confident about taking care of "future you." 🏠

Mark Ashe has taught economics and personal finance in public schools for more than 25 years. He is a licensed investment advisor and fiduciary. The commentary in this article is not professional investment advice or an endorsement of any kind. This article is for informational purposes only and should not be relied on to make any investment decisions.

4. Consider appropriate life insurance.

How much you need depends on your goals and circumstances (i.e. paying off the mortgage or sending kids to college), but choosing low-cost term life insurance instead of an expensive whole life policy can help you save more for retirement.

40s

1. Assess how much you have saved.

Look at how much you have now and how much you may need to save by the time you retire. The average retiree spends 75 percent of the annual income they had while working.

2. Plan for the spending gap.

You will need enough retirement savings to make up any gap between your expenses and anticipated pension and/or Social Security. A simple rule of thumb is to divide your annual spending gap by 4 percent. This can provide a rough estimate of how much savings you may need for a

30-year retirement. So, if you anticipate a \$30,000 annual gap between your retirement income and retirement spending, dividing this number by 4 percent would mean that \$750K in retirement savings may be necessary. Then use this rough estimate to see if you are on track to reach this goal by retirement.

50–60 years old

1. Determine whether you still need life insurance.

By now, your retirement nest egg may be big enough to protect your family should you pass away unexpectedly. If you no longer need the insurance, put any unneeded insurance premiums toward your retirement savings.

2. Reevaluate when you are five to seven years out from retirement.

Ensure that your portfolio is well diversified with a few different stock and bond funds. This makes managing your portfolio more

Money Changes EVERYTHING

By Tim Walker

SALARY INCREASES ARE HELPING TEACHERS STAY IN THE PROFESSION, BUT MORE PROGRESS IS NEEDED

Ten years ago, South Carolina was hemorrhaging teachers. “We couldn’t find anyone. Teachers were leaving mid-year, and hiring subs was difficult,” recalls Sherry East, who served as president of The South Carolina Education Association (The SCEA) from 2018 – 2025.

The state reported more than 1,600 teacher vacancies in the 2023 – 2024 school year—a huge increase from pre-pandemic numbers. But South Carolina may—*may*—have turned a corner. As the 2024 – 2025 school year began, vacancies dropped 35 percent.

“Teacher salaries have increased and most certainly helped drive down vacancies,” East says. “In many districts, pay rose quite substantially.”

According to the “2025 NEA Teacher Salary Benchmark” report, South Carolina ranks 30th nationally in starting teacher salary and 36th in average teacher salary. The state has slowly but steadily climbed the rankings every year since 2020, when it stood at No. 42.

Across the country, teacher salaries are heading in the right direction. During the 2023 – 2024 school year, teachers received the most significant year-over-year pay increase in more than a decade. But even with record-level increases in some states, average teacher pay has failed to keep up with inflation. Adjusted for inflation, teachers are making an average of 5 percent less than they did 10 years ago.

Still, Eric Burruss, a fine arts teacher in Sumter County, says the impact on educators in South Carolina is real.

“When I started teaching in 2015, I had a mortgage, car payments, and everything else that comes with life,” he says. “Ten years later, is it easier? Yes. Have we been able to retain more teachers? Yes. Could it be better? Yes. But now I can say, I have my head above water. I can finally breathe. And that’s something.”

‘Treat me like a professional’

Burruss entered the teaching profession in 2015, knowing he would take a pay cut from his earlier job and

“We have made progress, ... but how can we attract new teachers on the pay we’re offering?” asks Eric Burruss, who teaches in Sumter County, South Carolina.

During the 2023 – 2024 school year, teachers received the most significant year-over-year pay increase in more than a decade. But average teacher pay has failed to keep up with inflation.

that teaching in a Title I school, like Sumter High School (his alma mater), would bring its share of challenges. But Burruss has deep roots in the community and a profound appreciation for the impact his teachers had on him. “[This was] where I needed to be,” he says.

That may sound like a “calling,” but this well-intentioned term can be problematic. Too often it provides an excuse to avoid paying educators what they need and deserve. Burruss loves his school, his colleagues, and his students, but even with the recent pay increase, the district will continue to face recruitment challenges, he says.

“We’ve made progress in retaining teachers, but how can we attract new teachers on the pay we’re offering—especially when adjacent districts can offer up to \$10,000 more per year?” he asks. “We have to continue to do better.”

In South Carolina and across the nation, educators holding down two jobs is far more common than it should be. According to a 2024 NEA survey, 40

percent of pre-K–12 teachers had more than one job. Burruss supplements his income with additional work within the school system, including teaching performing arts in the district’s program for academically gifted students.

“People will always tell you, ‘Oh, I couldn’t do your job, and you should make more,’” says East, who sold auto parts on the side for two decades. “We tell them, ‘Well, I’ll do my job, but pay me more and treat me like a professional.’”

The impact of teacher voices

Educators in states without collective bargaining can still win higher pay. Like in South Carolina, many of these states have notched up major salary wins through local or state-level advocacy.

Still, there’s no denying the union advantage. The fact is that educators who work in states with collective bargaining laws make more money.

Starting salaries and top pay for teachers are higher in states where

Money Changes EVERYTHING

collective bargaining is legal. And teachers in 9 out of the 10 states with the highest average starting salaries were all covered by comprehensive collective bargaining laws.

Working in a state where collective bargaining is prohibited cuts off a critical mechanism for winning higher pay. So, educator advocacy in South Carolina centers around school boards and the state legislature.

And when The SCEA members tell their stories to state lawmakers and other elected officials, real change can happen, says Dena R. Crews, current president of The SCEA.

“Many lawmakers don’t really understand until they hear about our lived experiences,” she says. “We are their constituents; they represent us. So, we need to tell them about our low pay and the struggles we endure just to make ends meet. It has an impact.”

“We’ve gone from \$36,000 starting salary to \$48,000 in three years,” East says. “And some districts have been able to push that to more than \$50,000. These are potentially life-changing jumps in pay.”

Charleston leads the way

Nowhere in South Carolina, and perhaps in the entire country, have these increases been more dramatic than in Charleston County. In mid-2024, the starting salary for teachers in the school district—the second largest in the state—catapulted past the state average to \$56,200 and will increase this upcoming school year to \$64,000. Before the raises, the district had more than 100 teacher vacancies each year. In early 2025, after the raises went into effect, the district reported a mere handful scattered across the district.

These changes did not come quickly. It all started three years ago, when Chief Human Resources Officer William

Briggman announced the formation of a Teacher Compensation Task Force. His motivation? Concern about teacher recruitment and retention in the face of a meteoric rise in Charleston’s cost-of-living.

“Teachers couldn’t live here or near the communities they serve,” says Patrick Martin, a teacher at Charleston County School of the Arts and a longtime advocate for higher pay. Martin offered to serve on the task force, although he had to manage his expectations first.

“Sometimes these kinds of groups are really just about people, politicians usually, just looking for a soundbite,” Martin recalls.

That skepticism quickly evaporated. Briggman put the work in, assembling a coalition of teachers, principals, businesspeople, and community members to work together on the issue. But it was those educator voices that Briggman wanted most to highlight.

“Teachers would come in and tell their stories to the school board. The district produced videos with these

testimonials,” Martin recalls. “This was really key to building the relationship with the school board.”

Budget discussions centered on housing costs, instead of arbitrary dollar figures or a one-time bonus. So, the question was: What do teachers—particularly those newer to the profession—need to earn so they can live closer to where they work?

Starting in 2024, the school board began approving a series of measures boosting teacher salaries across the board. In addition to the dramatic increase in starting pay, the board also added 12 steps to the district’s pay schedule, pushing top salaries well past \$100,000 from a previous limit of \$81,000.

In addition to the resulting drop in staff vacancies, says Martin, the increases have led to a much-needed morale boost in Charleston County. “You can see it in classrooms, hallways, and out in the community.”

From No. 39 to No. 7

“Teachers feel respected and valued when they are paid well,” says Julie Wojtko, president of NEA-Las Cruces, in New Mexico. “The salary increases we’ve received have made a huge impact.”

By the 2023 – 2024 school year, New Mexico had moved up to 7th from 39th in the country on starting salaries, and from 49th to 21st on average salaries, according to NEA data.

Meanwhile, in Texas, where Wojtko’s sister teaches, salaries have stagnated at \$10,000 below the national average. Veteran educators are especially hard hit. “[My sister and I] both have our master’s degrees, and my sister works so hard. But I make more than her, and that’s not right,” Wojtko says. “Texas does not have a strong, pro-public education governor. ... And there is no collective bargaining. We have that in New Mexico, and it makes a difference.”

Mia Dimbo, a math teacher in Bridgeport, Conn., says low pay is deepening the educator shortage in her district.

remain inadequate. And incoming cuts to federal funding—a sizeable chunk of Bridgeport’s budget—are an added worry. “We get so much from the federal government. We already have a huge recruitment and retention problem. It’s hard to even think about,” she says.

The next level

In South Carolina, the next step for The SCEA is to get starting salaries up to \$50,000 statewide by 2026, a goal supported by many in the state legislature. “That’s where we need to go soon, because we still have a lot of work to do to attract and keep teachers in the profession,” Crews says.

The Teacher Compensation Task Force that led the successful effort to boost salaries in Charleston has been rebranded as the Teacher Recruitment and Retention Task Force. “We’re looking at other issues, like improving working conditions and child care,” explains Martin. “And we’re sharing our story and best practices, because we need to help pull up the rest of the state as well, so that we’re not just one pocket where this is happening.”

In Sumter County, Burress is cautiously optimistic that recent increases will continue to help retain the educators the district has been able to bring in, but salaries are still not high enough to attract new people to the profession. “We’ve made progress, no question. But it’s still difficult to recruit. So, with salaries, we have to get to that next level. There’s a model we can follow in Charleston, so maybe we can catch up to them!” 🌟

In states where pay has increased significantly, the cost of living in many of these areas can negate much of the positive benefit. Even in states that rank in the top 10 for average teacher salaries, educators and their unions continue to fight for professional pay.

According to NEA data, the average teacher salary in Connecticut is \$86,511 (sixth nationwide), with an average starting salary just below \$50,000. The cost of living in the state, however, is 21 percent higher than the national average.

“I know educators who make more than \$70,000 and still need a second

job or have two or three roommates,” says Mia Dimbo, a math teacher in Bridgeport, the largest district in the state. Dimbo says the teacher shortage in her cash-strapped district is severe. “We’re an urban school district and are surrounded by wealthy suburbs. At my school, we can’t get certified teachers. We rely too heavily on long-term subs. We haven’t had a science teacher in five years.”

As a veteran teacher, Dimbo says she does OK, but continually worries whether new teachers will ever want to work in Bridgeport, if salaries

Hands Off SCIENCE!

By Mary Ellen Flannery

FROM CLIMATE CHANGE TO CYBERSECURITY, FEDERAL RESEARCH CUTS ARE KILLING INNOVATION

If you are a parent of a child with muscular dystrophy, you will want to know what's happening in Clarissa Henry's University of Maine lab.

If you have an antibiotic-resistant infection, Terri Ellis is looking for solutions in her University of North Florida (UNF) lab.

Climate change. Sudden cardiac arrest. HIV prevention. Teacher recruitment in math and science. These

issues are among current STEM challenges—and NEA Higher Ed members won competitive federal grants to study them because they

have unique expertise.

Today, however, Henry may have to shutter her lab. With the National Institutes of Health (NIH) facing a proposed 40 percent budget cut, her grant hasn't been renewed. And Ellis? While her own

research continues, her NIH grant to provide low-income UNF undergraduates with paid research jobs—the kind that would get them into medical school or Ph.D. programs—was terminated in the spring.

"This [was] a grant about building for the future," says Ellis. Now, not just at UNF, the future of American science is uncertain.

'Throwing away results'

This spring, NIH terminated more than 1,300 research grants, while the National Science Foundation (NSF) terminated more than 1,600.

And while big-name universities have taken notable hits, the axe has also fallen hard at state universities and community colleges.

Unlike larger, private universities, these institutions simply don't have the money to fill the gaps and enable

faculty to finish their work. Midway through their grants, NEA Higher Ed members have mountains of new information, but not the funding to analyze and publish it.

Western Washington University professor Caroline Hardin was two-thirds of the way through a three-year grant when her NSF funding was suddenly terminated. Her team's task? Figuring out how to increase the number

of computer-science teachers in the U.S., especially educators of color and women.

NSF also terminated Claire Wladis' \$2.2 million grant that supported

research intended to help college students with chronic mental and physical health issues. "This is an area where there is no research," says Wladis, a City University of New York professor. Her study

Caroline Hardin

Claire Wladis

University of North Florida professor Terri Ellis led a federal grant providing low-income students with lab experience—the kind that would lead to careers in medicine or pharmaceuticals. It was terminated.

where about 1 in 3 students qualify for Pell Grants, Ellis' NIH grant was helping low-income undergrads stay on the path to medical school or advanced science degrees. The grant paid the students \$1,000 a month to work in research labs, including at the Mayo Clinic in Florida. It also provided structured mentoring and tuition assistance.

"The reality is, to get your start in biomedicine, you have to have undergraduate research experience," notes Ellis. And while more affluent UNF students have time to do unpaid work, she adds, "You can't do it if you're working as a checker at [the supermarket] to pay your tuition bill."

Recently, some research grants have been reinstated, thanks to a lawsuit filed by attorneys general in Democratic-led states. Florida was not among them.

Faisal Aljamal

Isn't education a priority?

More than half of the terminated NSF grants were STEM education grants, aimed at questions like: What will it take to get more STEM teachers of color? Or how do we get more girls to study cybersecurity?

Professor Faisal Aljamal runs a renowned cybersecurity program at New Jersey's Hudson County Community

"There is no way that private industry or philanthropy or states can make up for the miracle of U.S. federal science funding, which ... produces so many ripple effects in new technologies, new science, new medicine."

—Krista Harper, University of Massachusetts anthropologist

was the first—and it had the potential to help tens of thousands. "And now we're like, it's never going to see the light of day?" she says.

One or two years into their work, these research teams have answers—but their grant terminations mean they can't share them. "You can't tell me that this is about efficiency. This is so profoundly inefficient!" Hardin says. "It's throwing away results that taxpayers paid for!"

Ripple effects

For generations, U.S. science has been "a marvel," says anthropologist Krista Harper, who works with the University of Massachusetts

Amherst's Energy Transition Institute. In the spring, she and her colleagues lost a \$6 million NSF grant aimed at helping communities move toward sustainable energy systems.

"It feels like a ship going down," she says. "There is no way that private industry or philanthropy or states can make up for the miracle of U.S. federal science funding, which ... produces so many ripple effects in new technologies, new science, new medicine."

Federal grants also produce new scientists. At UNF,

Hands Off SCIENCE!

College. In 2024, he won a three-year, \$599,611 NSF grant to expand his program, especially among women. The first year was completed in May. "The grant evaluator was amazed at what we were able to accomplish. And then, boom!" Aljamal says. The grant was terminated.

"Everybody is talking about the international threats and the need for our graduates at federal agencies," he says. "We're contributing to our country's defense!"

With these terminations, scientific agencies are likely trying to comply with President Trump's efforts to end federal investments in diversity, equity, and inclusion. The form letters received by faculty simply say their work "no longer effectuat(es) program goals or priorities." Aljamal asks: Isn't cybersecurity a priority? Isn't computer science a priority?

"People in a lot of areas are being left out, and it's hugely detrimental to American competitiveness," Hardin says.

"How do we get more rural students? More women? More People of Color? ... If you want to expand opportunities, you have to go to the people who don't have the opportunities." ❄️

(Left) City University of New York union members protest cuts; (top, left to right) NEA Secretary-Treasurer Noel Candelaria rallies with union leaders Alec Thomson, Brett Smith, and Marcia Mackey, in Michigan.

Studying Zebra Fish in Maine: A federal investment in your health

Forty or so years ago, scientists at the University of Utah found an alternative to the laboratory mouse. Meet the zebra fish.

"Fish are a fantastic model!" says University of Maine professor Clarissa Henry. Cheaper and easier to grow than mice, zebra fish also are externally fertilized, which means scientists can actually "watch disease happen," Henry explains.

Clarissa Henry

For the past 20 years, Henry and her team of students—as many as 4 doctoral and 12 undergraduate students at a time—have used zebra fish to study skeletal muscular development.

Fun fact: Your grip strength is a better predictor of how long you'll live, and whether you'll die of a heart attack, than any blood test. Muscle strength really matters to human beings.

In Henry's lab, which received more than \$13 million from NIH over the years, her goal is to rigorously investigate what kinds of activities promote muscle health.

The implications for humans, especially those with muscular dystrophy (MD) are huge. For years, doctors have told people with MD to avoid exercise. The cells that replenish muscles don't work well for them. But Henry's team has found a mode that improves muscle structure and lifespan, she says. Unfortunately, her NIH money ran out this summer—and no money means no lab. Today, Henry is searching for new funds.

Help! I'm an Educator and I'm Being Bullied

ADULT BULLYING EXISTS IN K-12 EDUCATION, AND IT'S HARMING THE SCHOOL CLIMATE AND THE PROFESSION

By Sundjata Sekou, elementary school teacher, New Jersey Education Association

We know what to say to students. Don't remain silent. In a calm, firm voice, tell the bully to stop. Avoid the places where the bullying occurs.

But what if the victim is an educator—and the bully is a co-worker, administrator, or district employee?

That's what happened to Jaclyn Headlam, a 30-year-old New Jersey school counselor who was contracted to work for a school in Monmouth County. The principal told her again and again that she was too young to be in a supervisory role and too young to work on the principal's team.

Headlam recalls that when she planned school trips, the principal would cancel them or allow them to happen only if one of the principal's allies went along. And before Headlam could meet with students, she had to send a list of names to the principal. Then the principal would talk with the students and decide whether the meetings would take place.

"This type of behavior is not how counseling is supposed to be," Headlam says.

She remembers how the principal used microaggressions and intimidation tactics against her and other school staff. They knew to be careful to avoid incurring the principal's wrath, Headlam adds. Fed up with the principal's behavior, Headlam found a new position as a school counselor in another New Jersey district.

How do you know if you're being bullied?

Richard T. Geisel, a professor of education leadership at Michigan's Grand Valley State University, notes that in the education field, "We are in the people business, so it's not surprising that it's a workplace environment that occasionally lends itself to conflict, disagreement, hurt feelings, and sometimes adverse employment actions." But bullying, he says, "is something entirely different that erodes the dignity and humanity of the individual being bullied."

"An Examination of Adult Bullying in the K-12 Workplace: Implications for School Leaders," published in the *School Leadership Review*, Geisel and co-author Cynthia J. Kleinheksel define adult bullying as the "repeated, persistent, non-physical mistreatment of a person that threatens the psychological integrity, safety, and health of the target."

The researchers cite examples such as "spreading false information about a worker, spreading malicious gossip, discrediting a person's work performance, making personal character attacks, isolating a worker physically or by not including them in communication loops required to do their jobs, or belittling them."

Adult bullying, the authors write, can cause victims to withdraw, experience distress, or believe they are to blame for the harassment.

"The first thing to do is to simply acknowledge that adult bullying exists in K-12 education and to

recognize the long-term, adverse effects of adult bullying on school climate and the profession ... if it isn't addressed proactively and constructively," Geisel says.

A pattern of mistreatment

Fear and intimidation are all-too familiar to Abby Taylor, an elementary school teacher and president of the Hamilton Southeastern Education Association, in Fishers, Ind.

It all started when the district began moving teachers from general education to special education, focusing on those who had dual general education and special education licenses. As the union president, Taylor started asking questions about how these decisions were being made.

"The district's representative really felt like we were pushing back on him," she says.

Over time, the district staffer started harassing her, raising his voice on the phone, complaining to the state union about her, sending her text messages, and leaving belittling voicemails that said she couldn't do her job.

When Taylor recalled these traumatic experiences, she needed a moment to compose herself. The bullying only stopped when the representative left the district.

You have rights and protections

Follow the same advice you would give a student: Tell an adult. "If the bullying offender is district personnel, members should inform the principal," Taylor says. "If it is a principal doing the bullying, members should tell their association representative immediately."

Research your district's policies on harassment, intimidation, and bullying, and create a paper trail by sending a follow-up email after every face-to-face or telephone conversation, Taylor advises.

Investigate your state laws. In some (but not all) states, it's legal to record conversations with or without the other party's consent. And, if you live in Maine, a law that passed in 2021 now protects school employees from bullying by administrators, school employees, parents, students, or any other individual associated with the public school.

Abby Taylor

It's important to know your rights. Every educator has protections, whether the bullying is based on age, experience level, a recent return from maternity leave, or another reason. Headlam urges all school workers to understand the employee handbook and the district's human resources policies.

Ask your union for help. In states with collective bargaining rights, educators should understand their contract, know when it's violated, and be familiar with the grievance process, Headlam advises.

Even if your state doesn't have collective bargaining, contact your union representative or state affiliate. They can help you understand how you are protected and what actions you can take to stop bullying and mistreatment. ❖

COMICS

The Superheroes of Welcoming Classrooms

IT'S A BIRD ...
IT'S A PLANE ...
IT'S A CHAMPION OF INCLUSIVITY!

By Cindy Long

In today's public schools, would a Superman comic be considered too controversial for a social studies curriculum? The idea makes for an interesting classroom discussion, especially in an environment that questions anything that touches on equity and inclusion.

Consider this: In 1949, DC Comics (formerly National Comics) produced a schoolbook cover featuring Superman talking to school children, drawn by artist Wayne Boring. "And remember boys and girls, your school—like our country—is made up of Americans of many different races, religions, and national origins," Superman says. "So ... if you hear anybody talk against a schoolmate or anyone else because of his religion, race, or national

Tim Smyth

origin—don't wait: Tell him that kind of talk is UN-AMERICAN."

How would the Man of Steel's words go over in today's political climate? Discuss!

In Tim Smyth's high school social studies classes, he often uses comics to supplement traditional texts for history and current events discussions. "Comic books serve as a time capsule that reflect the news of the day as history is happening," says Smyth, who teaches in Ambler, Pa.

"History isn't just kings and queens, battles and dates, it's made up of stories from a time and place. And comics, which come out weekly, can be used as historical artifacts from different eras."

Like Smyth, many teachers across the country use comics and graphic novels to supplement classroom lessons, as students' interest in these formats explodes. Comic and graphic novel readership among young people grew by 56 percent in the 2022 — 2023 school year, according to *School Library Journal*.

"Comics and graphic novels allow students to connect with curriculum more deeply, especially if they see themselves in the story," Smyth explains.

'Truth, justice, and the American way'
(Superman)

It's not surprising, he says, that Superman would make a statement about acceptance in the wake of World War II, as waves of refugees and immigrants arrived in America—just as there are refugees and immigrants today.

A post-World War II Superman comic, modern-day *Madaya Mom*, a Batman strip addressing gang violence, and countless other comics bring historical events and public discourse to life for students.

"Superman, too, was once an outsider, a newcomer to America," Smyth notes. "A superhero reminding us that we are all Americans sends a powerful message to students."

For his lessons on war and their aftermath, Smyth uses a Superman comic from 1985, where the superhero is the sole survivor of a nuclear war. The comic reflects society's fears of the Cold War and the threat of nuclear bombs more viscerally than a traditional text.

He also introduces contemporary comics, such as Marvel's *Madaya Mom*, a comic that tells the true story of a mother and her five children who were trapped inside the Syrian town of Madaya for more than a year.

The comic is based on texts sent to ABC News. The news outlet then partnered with Marvel and Croatian artist Dalibor Talajić, who lived through

Comics

The Superheroes of Welcoming Classrooms

war during the breakup of the former Yugoslavia.

The comic shows how the mom fights off starvation, unsanitary living conditions, and threats of violence as the family is caught between warring factions in the country's civil war.

"Students connect with this comic very emotionally," Smyth says. "It's very hard to comprehend 13 million people displaced from their country, but when you boil it down to one person, one family, and show war's impact through a medium like a comic, it creates a very deep connection."

The class discusses the historical and social implications of the comic and applies them to the human experience of war and persecution throughout history.

'Anyone can wear the mask.'

(Miles Morales)

Reading *Madaya Mom*, students see that not all superheroes are men in tights with capes.

"Superheroes are not defined by their powers or their physique. Superhero is in the heart," Dalibor Talajić told *ABC News*. "*Madaya Mom* fits within this category because she finds the strength to be human and unhardened."

Comics can humanize lessons on history and current events, especially when students can see themselves in the characters, Smyth says.

"As Miles Morales says in *Spider-Man: Into the Spider-Verse*: 'Anyone can wear the mask,'" Smyth adds. "That's the power of comics."

Speech and language pathologist Jana Tropper also uses comics in her practice. Students not only see themselves in comics and graphic novels, she says, but the format helps reinforce vocabulary from lessons.

"The science shows that brains simultaneously interpret the visual and

textual information, and the connection is stronger when they're together," says Tropper, who teaches at an elementary school outside of Chicago.

She adds, "Teaching with comics embraces brain differences and engagement in visual learning."

'In brightest day, in blackest night'

(Green Lantern)

The students in Tropper's classroom have disabilities, including students who are autistic. Tropper has found that comics help them connect with

Jana Tropper at Comicon

the world around them and build their communication skills, particularly in lessons where they create their own comics. To do that, Tropper and her students use Pixton, a popular program for creating comics.

One of her students who has autism created a comic to cope with his fear of storms.

"He was reluctant to go outside when there was even a hint of a cloud," she says. "He's very uncomfortable with weather, and tornado drills make him extraordinarily anxious."

Enter Captain Cloud. There's a storm forming on the horizon? That's a job for Captain Cloud!

Tropper helped the student create a comic where he's a superhero, a version of himself where he could cope with weather changes. They created a visual of him in costume on the playground.

"It gives him a preview of what he could be like outside on a cloudy day," Tropper explains. Now he feels brave enough to weather overcast skies.

'Holy [literacy], Batman!'

(Robin)

Comic books can be a powerful format for storytelling, because the art conveys information, Tropper explains, much like evacuation instructions on airplanes or IKEA furniture assembly guides.

Comics and graphic novels can be an option for all students to augment, broaden, and deepen curriculum. They can engage reluctant readers and increase comprehension for students working on decoding or working memory.

"They might not be for every student, but they're a great option for visual learners," Tropper says. "One student could read *Little Women*, while another could read *Jo* [a graphic novel adaption of *Little Women*], and they could talk about the same concepts without decoding being a gatekeeper. Visual literacy needs to be brought to all content areas."

'You've got the costume. You've got the power.'

(Spider-Man)

Tropper offers creative tips for how to use comics in all kinds of lessons.

Make a copy of a comic page, and block out one panel, then ask students to fill it in.

In this Freestyle comic by Gale Galligan, red lines emanating from the boy's head show anger—an example of visuals called "emanata" that show emotion.

"By drawing attention to the details in the images in the panels before and after the blocked panel, you're teaching students about inferring," she explains.

"*Calvin and Hobbes* or *Garfield* are good ones—they usually have a setup, a disaster, and then an explanation. If you remove the disaster panel, the wild ideas the kids can come up with about what happened never cease to amaze me!"

Try removing the dialogue from a word balloon so students have to examine what happens before and after, looking at how others react and what facial expressions convey, to infer what the word balloon might say.

"The students make their case about what was said by offering evidence, which is higher-level reasoning."

Next, introduce students to emanata (eh-mah-NAH-tah), the visual elements

For an autistic student who was afraid of storms, creating this comic helped him feel safe outside on cloudy days.

'I could do this all day.'

(Captain America)

"Meeting kids where they are is the only way we can connect with them in this era of increasing needs and decreasing resources to serve them," Tropper says.

There is an ever-increasing number of students who want to read comics and graphic novels, and they have fun reading and learning from them, she says.

"Educators can get them to learn what we want them to learn with the materials they choose," she adds. "By letting them choose the medium, they'll be more engaged."

Tropper acknowledges that some find comics and graphic novels less serious than traditional prose, but she disagrees strongly, and has seen time and again how effective they are with her students.

"There are incredibly moving tales in 'just comics.' We take fine arts seriously, and we take literature seriously, but put them together and some people lose their minds. They decide it doesn't count," she says. "My question is, why can't school and learning be fun?" 🦸

Graphic Novels for Your Classroom

There are hundreds of graphic novels, and more are coming out constantly. Tim Smyth and Jana Tropper recommend some titles at nea.org/GraphicNovels.

Three Steps to Financial Wellness

Falling short of your retirement savings goals or having trouble paying the bills? You are not alone. Many people are financially out of balance. Financial wellness means finding a balance between living for today and preparing and planning for tomorrow.

1. Protect what you have with insurance.

"Life, disability, and long-term care are vital components of a comprehensive financial strategy," says financial planner Nick Ventura, president and CEO at Ewing, N.J.-based Ventura Wealth Management. "Having these elements in place will offset the risks of catastrophic events."

2. Plan for life after you're gone.

Most people don't want to contemplate their own mortality, but putting off estate planning is ill-advised. In addition to arranging for an authenticated will and a trust, you should designate beneficiaries for your retirement accounts.

3. Get an early start on saving for retirement.

Putting off long-term retirement saving could cost you. To get started, designate contributions as a percentage of your income, not as a flat dollar figure. Also consider increasing your contributions each year to match any salary increases.

NEA Member Benefits can help. Get started with benefits for insurance, retirement, and more at neamb.com/Overview.

Need a grant?

Apply for the NEA Foundation's \$2,000 and \$5,000 grants for individuals and teams of education professionals to support instructional practice or professional development across all subject areas and grade levels.

Want to bring the world to your classroom?

These resources and opportunities can help connect you, your classroom, and your students with ideas and people around the world. Download classroom resources from the NEA Foundation's Global Learning Resource page to help your students become 21st century global citizens. Join a learning community of educators committed to global education advocacy.

Find more resources and programs offered by the NEA Foundation—a public charity founded by educators for educators—at neafoundation.org. Follow us on Facebook and YouTube for updates.

Applications are reviewed three times a year (winter, spring, and fall).

Find Tools for Your Practice

- Looking for professional learning opportunities and resources to bolster your lessons?
- Legal guidance on educator rights?
- Or just good advice from fellow educators?

Check out NEA's online resource library, where you can search by keyword, issue, resource type, and more to find the latest and best professional resources from NEA. Visit nea.org/Resource-Library.

59TH ANNUAL NEA HUMAN AND CIVIL RIGHTS AWARDS

CALL FOR 2026 NOMINATIONS

Now an individual, organization, or affiliate that champions racial and social justice and civil rights within their community? Show your support and uplift their good work on the national stage by submitting a nomination for a 2026 Human and Civil Rights (HCR) Award. Honorees are recognized during the annual HCR Awards program, held in July, prior to NEA's Representative Assembly.

- **Identify and honor** exemplary individuals, organizations, and affiliates for their contributions to human and civil rights, and racial and social justice.
- **Celebrate** NEA's multicultural roots and commitment to justice.
- **Recognize** today's human and civil rights victories and chart the path forward.
- **Honor** the rich legacy of the merger between the American Teachers Association (ATA) and NEA, from whence the HCR Awards program began.

The work of civil rights and social justice heroes is as critical today as it was yesterday. Let's work together to remind everyone that the cause endures, the struggle goes on, and hope still lives!

Identify your nominees now! It is never too early to begin profiling nominees and potential HCR Award winners! Find information on past winners and submit nominations for the 2026 HCR Awards at nea.org/HCRAwards.

Nomination forms and instructions for the 2024 HCR Awards will be available online until Dec. 6, 2025, at nea.org/HCRAwards.

FOR MORE INFORMATION, please email NEAHCR Awards@nea.org.

Educators, let's elect the leaders our students deserve.

PAC

GIVE.VOTE.WIN!

Your contribution to the NEA PAC helps elect pro-education candidates up and down the ballot. Scan to get started.

Contributions to the NEA Fund are not deductible as charitable contributions. Contributions to the NEA Fund are voluntary and will be used for political purposes. Making a contribution is neither a condition of employment nor membership in NEA, and members have the right to refuse to contribute without reprisal. A member may contribute more or less than the suggested amount, or may contribute nothing at all, without affecting membership status, rights, or benefits in NEA or any of its affiliates. Federal law requires NEA to use its best efforts to collect and report the name, address, occupation, and employer for each individual whose contributions aggregate in excess of \$200 in a calendar year.

LAST *Look* Say It **LOUD,** Say It **PROUD!**

Wearing hearts on our sleeves and union pride on our tees, NEA members will not be silenced. Together, we are standing strong in our union power and our belief that all students have a right to an honest and equitable education!

A Legacy of Opportunity Starts With You.

Invest now in the students of tomorrow.
