NEW BUSINESS ITEM 2026-2

I move that the NEA-Retired support NBI 29 at the NEA Representative Assembly in removing the maximum amount of earnings on which you must pay Social Security Insurance tax. The NBI at the RA is "I move that the NEA, in conjunction with the NEA-Retired, work to remove the maximum amount of earnings on which you must pay social security tax, so that all earned income is taxed."

Rationale:

Fears of the insolvency of Social Security would be eliminated if all earners paid their fair share. This year, after you have earned \$184,500, you no longer pay any SS tax on any additional earnings for the year. Over 18% of American households exceed this cap. It is estimated that this could bring in approximately \$475 billion in additional revenue in a single year.
